MID-TERM ADDRESS
OF
HON. FRANCIS J. LAWLER

MAYOR OF NEW BEDFORD

TO

CITY COUNCIL

JANUARY 8, 1959

Reynolds-DeWalt

MID-TERM ADDRESS
OF
HON. FRANCIS J. LAWLER
TO
CITY COUNCIL
JANUARY 8, 1959

MR. PRESIDENT, MEMBERS OF THE CITY COUNCIL,
MY FELLOW CITIZENS:

Since my inaugural address one year ago, another chapter has been written indelibly in the pages of New Bedford's history.

Close scrutiny discloses much on the credit side of the ledger, while some of our actions must necessarily be entered on the debit side of the ledger.

Let us now quickly review the year 1958, and project ourselves into 1959 with all of its challenges and problems.

Major projects, planned and completed, were the main accomplishments with resultant benefits to our present and future citizens.

Important among these were the installation of roads, sewer and water lines in the Industrial Park, and the happy announcement, on Christmas Eve, that the first plant will be constructed by June 1st of this year. A new firm with a tremendous growth potential, employing mainly male help, is our first occupant. This initial success in breaching what many times seemed to be an impregnable wall of industrial stagnation gave everyone a tremendous psychological lift.

It provides us with an excellent start in plotting future development of the park and serves as a forerunner of many more to come.

Acquisition of this initial plant was not easy, but in retrospect, all the heartaches and pitfalls involved along the way were certainly worth all the energies expended, because we can now visualize the Industrial Park in its true aspect as the key to the future economic stability of New Bedford.

At this point, I might mention with legitimate pride that the president of one of the largest companies in the United States, only last week in New York, stated flatly that our City could well be proud of its initiative and courage in undertaking such an ambitious project. This company, incidentally, is a promising prospect for early tenancy.

The new Maritime Terminal, with completion of engineering studies by the Commonwealth, has now assumed its proposed final form, and early development action can be expected.

We confidently expect that vacant waterfront property will soon be occupied with revenue producing buildings and firms which will also provide jobs for our citizens.

The off-street parking program has been initiated, and both the Center and North End merchants will soon reap benefits from it.

Establishment of a Planning Department, long a necessity, has been effected, and announcement of appointment of a City Planner may be expected shortly.

With the advent of the City Planner, urban renewal projects will have top priority, and definite long range steps in this vital area will be taken.

The newly established Traffic Commission has had its first meeting and traffic problems which long have been a

bone of contention in the City Council will now be carefully considered and solved with coordinated planning.

In the recreational field, vast improvements were made to our beaches and adjoining roads in the South End; a program of band concerts and block dances were instituted, and a children's fantasyland "Storybook Land," was built in the North End's Brooklawn Park.

The year 1958 also saw the construction of a modern library for the North End, and plans are on the drawing board now for a similar structure at Buttonwood Park in the West End.

On the darker side of the picture, I cannot omit reference to the unreasoning opposition of a majority of the members of the City Council to many of the proposals suggested by me in the interest of the general welfare.

Constructive criticism and well founded opposition are always welcome; but, unfortunately, partisan and personal politics have beclouded many deliberations of your body to the detriment of a majority of our citizens.

The action and persistence of the City Council in voting pay raises for Policemen, Firefighters and selected others, has seriously impaired the City's financial position, and created a morale problem among other municipal employees.

This year of 1959 will be a decisive one for New Bedford.

We are at the gateway to economic revival, and any attempt to burden our municipal financial load at this time is recklessly dangerous, and might well result in the gate being slammed in our face.

Your philosophy of "raises for all who want them" must be changed.

Your attitude towards unwarranted spending must be altered!

The watchword for all of us must be sane and cautious thrift.

When we bluntly consider that current budget requests are One Million, Eight Hundred Thousand (\$1,800,000.00) Dollars more than last year, that the School budget will be much higher, that mandatory increases in Welfare costs and Pensions are inevitable, that expenditures for State and County Government are mounting, then, and only then, will we fully realize that a stringent financial policy is the only sane approach to insurance of a palatable tax rate for 1959.

Mutual understanding and cooperation between the administrative and legislative branches are absolute necessities if the picture of our economy in 1959 is to be kept bright and shining.

The main goal which I am setting for 1959 is the continuation and further acceleration of effort to induce new industry to locate in our community.

In order to realize that objective a tight budget policy and common sense thinking must prevail.

Again, I will submit to you a proposal to charge certain fees, as are charged by most cities and towns, for individual services rendered by the various departments and agencies such as electrical wiring inspections, building inspections, applications for zoning variances and many other services. As far as possible, these departments should be made financially self-sustaining.

We must be realistic in our approach to the search for added revenue, and endeavor to relieve and implement the tax load which presently is a burden on all property owners.

We cannot operate as a City did 50 years ago.

We must broaden our thinking to embrace the world of today and its modern problems.

The old systems must be abandoned and modern techniques applied.

Another serious problem, as I view it, is the crying need for a complete overhaul of our personal property assessing methods

Close scrutiny of our present system and the relatively small revenue received from this form of taxation discloses an appalling situation.

The Board of Assessors, an elected body, is as much an integral part of a successful municipal community as the Mayor and City Council.

They, too, must rise to the responsibilities of their elective office, and impose taxation in a realistic manner.

These, then, are some of the thoughts that I would leave with you as we embark upon a new municipal year.

Working together, as dedicated public servants, much can be planned and more can be achieved.

I earnestly bespeak your whole-hearted cooperation, and I humbly place at your disposal my full service and energy.

Our problems, realistically viewed, are no greater and no more complex than those which face the Nation, the Commonwealth, and our sister cities.

With team work, we can solve them; and I hope that, by this time next year, we can mutually congratulate each other upon the solution.

SUPERINTENDENT AND INSPECTOR OF BUILDINGS

ANNUAL REPORT

1958

In accordance with Chapter 7, Section 158 of the City Code of the City of New Bedford, I hereby submit a report of the activities of the Superintendent of Buildings for the calendar year of 1958.

BUILDING DEPARTMENT

For the year 1958, the Building Department issued a total of seven hundred and forty-six (746) permits, estimated at a valuation of Two Million, Nine Hundred and Ninety-four Thousand, Two Hundred and Twenty-six Dollars (\$2,994,226.00). There were Two Hundred Twenty (220) less than 1957 and the estimated valuation was Three Hundred Fifty-one Thousand, Three Hundred Fifty-eight Dollars (\$351,358.00) less than 1957.

Some of the larger jobs for which permits were issued are as follows:

S. S. Kresge Co.	\$110,000.00
First National Stores	190,000.00
City of New Bedford (Incinerator)	550,000.00
Laurans Bros.	115,000.00
National Biscuit Company	100,000.00
First Safe Deposit National Bank	100,000.00

The Sargent Field House started in 1957 was completed in May 1958.

The Wilks Branch Library was completed March 1958.

The Incinerator remodeling which has been held up by a restraining order by Morse Bolger Destructor Co. in 1957, was started in 1958 and has been under construction. A strike at the plant of the Harnischfeger Corp. and the bad weather have slowed up the job. The job is about 55% completed and will be finished early in 1959. Theodore Loranger & Sons has the contract for Contract "A" for the building and The Nyland Company has the contract for Contract "B" for the Incinerator Units.

SUMMARY OF BUILDING PERMITS**1958**

	Permits	Estimated Cost
*New Construction	232	\$1,625,090.00
**Alterations and Additions	357	1,334,636.00
Heating	48	33,950.00
Demolitions	96

	<hr/> 357	<hr/> \$1,334,636.00

There were one hundred fourteen (114) new one family dwellings and nineteen (19) new apartments added by conversion.

Comparative Summary of Construction for the Last Five Years:

Year	No. of Permits	Estimated Cost
1954	1,434	\$4,776,584.42
1955	1,055	3,473,385.29
1956	1,072	5,454,450.00
1957	965	3,345,584.00
1958	746	2,994,226.00

There were 100 special investigations during the year 1958. Special investigations are made as the result of a complaint by a tenant or a neighbor relative to a violation of zoning or building code.

There were 58 sign applications during 1958 which were forwarded by the City Clerk to be approved by this department as to construction, site of location and method of erection and maintenance.

There were 309 freight and 74 passenger elevators inspected during 1958.

Five new elevators were installed.

Elevator operators' licenses issued during the year were as follows:

Renewals	91
New Applications	33
	<hr/>
	124

During the year 1958, there were 30 appeals from the ruling of the Inspector of Buildings relative to the application of the zoning ordinances.

Granted	28
Denied	1
No action taken	1
	<hr/>
	30

Appeals that are granted are reversals of the rulings of the Inspector of Buildings; while appeals that were denied upheld the Inspector's ruling.

Places of assembly must be carefully examined according to Chapter 143 of the General Laws, as amended, before a license for their use can be obtained: every building or part thereof, used as a place of public assembly and capable of accommodating 50 or more people; where 10 or more people are employed; rooming houses and apartment houses having eight rooms or 10 people above the second floor.

The following places of assembly were checked and issued certificates during 1958:

Renewals	83
Office Buildings	3
Mercantile	1
Industrials	9

During the year 1958, 28 Rooming Houses having 650 rooms, were inspected.

A total of 7 inspections were made on Boarding and Convalescent Homes.

BUILDING MAINTENANCE

The Maintenance crew have had many projects during the year 1958.

In the Municipal Building the Council Chamber was completely renovated consisting of painting, installing shades and repairing chairs and settees. Many of the offices were painted including Clerk of Committees, Board of Health, Wire Department, Cemetery, Retirement, Veterans Benefits, City Treasurer's, City Clerk's and Registrar of Voters. Some exterior painting was also done. A new lawn was installed.

The miscellaneous plumbing, electrical and carpentry work in this building and all other buildings under our jurisdiction keep the maintenance men constantly busy.

Even though the Isolation and City Infirmary are closed, there are constant demands upon the services of the plumber and the rest of the crew.

The Whitman Mill has been a source of trouble during the past year. The sprinkler system has required a full time coverage even to the extent of a one man full time fire control.

Various Fire Stations have had repairs to roofs, floors and plumbing.

At the Stone Building, miscellaneous repairs and painting were done.

The Civil Defense Building, Cemeteries, Veterans, Building, Veteran Firemans, Wharfinger Building, Police Signal

SE SUPERINTENDENT AND INSPECTOR OF BUILDINGS

Station, Libraries, Parks, Police Stations and many others have all had the usual maintenance repairs.

On December 14, 1958, Frederick R. Ripley, who had been Superintendent and Inspector of Buildings for the last twenty years, passed away very suddenly.

Mr. Ripley had the fullest respect of the people of New Bedford, and was the first Superintendent and Inspector of Buildings with a Civil Service status having been voted this tenure on the ballot by the citizens of New Bedford.

During Fred's service in office, the Building Department was greatly expanded to include the Building Maintenance Department which was organized by him with a considerable saving to the city; the Custodian Service and the Plumbing Inspection Department were incorporated into the Department to consolidate the responsibility.

He served on the Regional Planning Board, Civil Defense, and many other public commissions, where his assistance, especially to the School Committee in helping to plan and carry through their school projects, was of great value to all.

In his passing, the people of New Bedford have truly lost the services of a conscientious and dedicated man.

In conclusion, I would like to acknowledge the assistance this department has received from associated individuals and departments in the performance of our duties and express our gratitude for this co-operation.

Respectfully submitted,

EVERETT A. DUNHAM,

Acting Superintendent and
Inspector of Buildings

Respectfully submitted,

EVELYN HENDRICKS,

Clerk of the Cemetery Board

BOARD OF CEMETERY COMMISSIONERS

To the Honorable Mayor and City Council
New Bedford, Mass.

Gentlemen:

The Cemetery Board herewith presents its sixty-fourth annual report.

During 1958, five of our employees retired from the department, namely; Mrs. Berenice E. Irving, Chief Clerk, with 45 years of service; Miss Grace E. Manchester, Senior Clerk, with 21 years of service; Mr. Fred E. Bochman, foreman, with 29 years of service; and Mr. Edward B. Sheehan and Mr. Florentino Addesso, laborers, with 15 years of service. Miss Evelyn Hendricks was promoted from Senior Clerk to Head Clerk, and Mrs. Doris E. Parker was promoted from Clerk and Cemetery Attendant to Senior Clerk.

Money was made available by a transfer from the Cemeteries, Sales of Lots Fund for black-topping some of our roads in Oak Grove Cemetery, planting of trees in our various cemeteries and installation of chain-link fence. We hope that, in 1959, money from the same fund will be granted to us so that we can continue the beautification and embellishment program in our cemeteries.

The need of new mowers and trimmers cannot be too strongly stressed. We cut grass on approximately five thousand lots, each year, and in order to fulfill our contract with the lot owners and keep our own property in a presentable condition we must have this much needed equipment, annually.

This department was given a choice space on the main floor of the Hammond Auditorium for the Kiwanis Flower Show, and we received much favorable comment on our display.

In October 1958, this department was notified by the New Bedford Board of Health Department that we must accept all OUT of State Burial Permits. Prior to this notification, all OUT of State permits had to be approved by Mr. Alphege Landreville, Agent of the Board of Health, before we could make the interments.

Our Memorial Day plantings were changed at the request of the Memorial Day committee. Instead of each veteran having one geranium placed on his grave, a large flower bed was planted on each of the War Plots. The public was very much in favor of this action, and it adds to the solemnity of the Memorial Day exercises held on each of our Veterans' Plots. A "Veterans' Memorial Plot" sign was placed on each bed.

With the assistance of the Vocational School personnel, a hot water heating radiator fan was installed in our West greenhouse at very little cost to our department.

Effective this year, no removal of hermetically sealed vaults will be made by us. We feel that inasmuch as these particular vaults are guaranteed by the companies that sell them, we believe it will relieve us of any liability and these removals should be made by them.

Seventy-two lots and fifty-seven graves were sold and forty-nine transfers and fifty assignments were made this year.

The minimum charge of four dollars for the annual care of lots was raised to six dollars this year.

We take this opportunity at this time to express our appreciation for the help, aid, assistance and cooperation received from His Honor the Mayor, Members of the City Council, Department Heads and our own department personnel.

Respectfully submitted,

JOSEPH J. BEATTIE, Chairman

RALPH E. SALTUS, Secretary

JOSEPH WALSH

SUPERINTENDENT'S REPORT

To the Board of Cemetery Commissioners

Gentlemen:

I herewith submit the annual report of the work done under my supervision during the year 1958 and recommendations for 1959.

RURAL CEMETERY

With the cooperation of the Water Department, we installed forty feet of three inch copper pipe, starting at our water main on Dartmouth Street and running up Central Avenue. This changeover gave us a good boost in our water pressure throughout the cemetery. Iron water pipe that has been in the ground, along Section 200, is in bad condition, and I recommend it be replaced with copper pipe. With the addition of a seven foot grass cutting machine, we have been able to cut all of the sections in the west part of the cemetery. The Grape Street lot was graded and seeded and it has made an added improvement to the community. I also recommend the replacement of trees that were taken down in the old part of the cemetery.

OAK GROVE CEMETERY

A new boiler was put into our greenhouses and it has been very satisfactory. Vandals broke about two hundred panes of glass, and after reports to the Police Department this condition was taken care of. The remaining dirt roads in the north part of the cemetery were black-topped and I recommend a black-top road around the entire old part of the cemetery, south of Parker Street. We hope to paint the greenhouses in 1959.

PINE GROVE CEMETERY

A new rough walk-in entrance was built at the east end of Pontiac Street, and makes the cemetery much more accessible to the people who live in the immediate area of the cemetery. I plan to get estimates for a new chain-link fence from the south side of Pontiac Street to our south line and

cementing up of the east wall. I recommend the extension of our water line into Section 16.

PECKHAM WEST CEMETERY

A new oil-base gravel road was built around the cemetery and a four foot chain-link fence was erected on the Mt. Pleasant Street side of the cemetery. We have received much favorable comment about the appearance of this cemetery, this year, and I hope the new gravel-base road can be black-topped in 1959.

GENERAL

During the past year all of our cemetery signs were repainted. The flag poles in all cemeteries were repainted and new Veteran Memorial Plot signs were made for our Veteran flower beds. We received a new 1958 Ford Ranch Wagon and the 1953 Chevrolet Station Wagon was painted black and is now being used at Rural Cemetery. We again entered a garden display in the Kiwanis Spring Flower Show and received many compliments especially, about the design of the clock. A certificate of appreciation was presented to us by the Kiwanis Club.

I express my thanks for the assistance I received from your Honorable Board, His Honor Mayor Lawler, members of the City Council, Department Heads and their personnel, and especially to the men and women of the Cemetery Department whose aggressive and conscientious support has made this annual report possible.

REPORT OF CARETAKER
of
SOLDIERS' AND SAILORS' GRAVES

New Bedford, Mass.

January 1, 1959

To the Honorable City Council of the
City of New Bedford

Gentlemen:

I hereby submit the following report of the work done on neglected lots and graves where soldiers and sailors are interred, as authorized in Chapter 218, Acts of Legislature, 1920:

	Care of Lots and Graves
Rural Cemetery	184
Oak Grove Cemetery	151
Pine Grove Cemetery	23
Peckham West Cemetery	27
Congregational Church Cemetery	2
Griffin Street Cemetery	9
Polish National Cemetery	5
	<hr/> 401

The amount appropriated for this work was \$2,500.00 and of this amount \$2,487.73 was expended for cutting grass, leaving a balance of \$12.27.

Respectfully submitted,

JOHN THORNHILL,

Caretaker of Soldiers'
and Sailors' Graves

ANNUAL REPORT

OF THE

CITY AUDITOR

OF THE

CITY OF NEW BEDFORD

MASSACHUSETTS

FOR THE YEAR 1958

REYNOLDS - DE WALT
New Bedford, Mass.
1959

CITY OF NEW BEDFORD

Office of the City Auditor

*To His Honor Francis J. Lawler, Mayor of New Bedford, and
the Honorable City Council.*

Submitted herewith are the following statements and schedules showing the receipts and expenditures for the City of New Bedford for the calendar year ending December 31, 1958 and the financial conditions.

Exhibit A—Balance Sheet as of December 31, 1958.

Exhibit B—Statement of Receipts for the year ending December 31, 1958.

Exhibit C—Statement of Expenditures for the year ending December 31, 1958.

Exhibit D—Summary of Receipts and Expenditures for the year ending December 31, 1958.

Exhibit E—Report of Appropriations, Receipts and Expenditures for the calendar year January 1, 1958 to December 31, 1958.

Exhibit F—Schedule of Bonded Debts and Sinking Funds as of December 31, 1958.

Exhibit G—Schedule of Indebtedness Payable at the close of the calendar years 1935 through 1958.

Exhibit H—Summary of Bonded Debt and Sinking Funds as of December 31, 1958.

The City of New Bedford closed the calendar year 1958 with a surplus of \$892,823.65 in the Excess and Deficiency Account.

I certify that in the course of the audit of the books and records of the City of New Bedford the cash on deposit and securities representing the investments of sinking funds of the City of New Bedford and several trust funds in the

custody of the commissioners, trustees and city treasurer were verified and found that the same were in agreement with reports and records rendered by said commissioners, trustees and city treasurer to the City Council.

Respectfully submitted,

SERAFIM E. MELLO,

City Auditor

CITY COUNCIL

During the year, the City Council held 20 regular meetings and 23 special meetings.

At the organization meeting held on the 6th day of January, Emile J. Cormier was elected President without opposition.

BUDGET

The Mayor's budget for 1958 was received by the City Council on February 20, 1958. It provided for the appropriation of \$14,662,174.79. The City Council held three quasi committee of the whole meetings for consideration of the budget and after cutting out money allocated for insurance on school buildings, adopted the same on the 7th day of April, 1958, in the amount of \$14,647,174.79.

Provisions for new equipment were made in a supplementary budget adopted April 24, 1958, in the amount of \$85,859.45. The funds were taken from the so-called Excess and Deficiency Account.

ORDINANCES

Innumerable ordinances were enacted during the year, included in which were the following:

- Apr. 24, 1958 Abolishing Traffic Advisory Commission.
- June 26, 1958 Establishing Salary of the Mayor — lost on referendum.
- June 26, 1958 Establishing Salary of Members of the City Council — lost on referendum.
- July 10, 1958 Establishing a City Planning Department.

- Aug. 14, 1958 Regulating Meetings of the City Council.
- Oct. 9, 1958 Establishing Hours for Civil Engineers in the Water Department.
- Oct. 23, 1958 Limiting the Emergency Powers of the Chief of Police — re parking.
- Nov. 13, 1958 Abolishing Industrial and City Property Board.
- Dec. 15, 1958 Paid Holidays for members of Police and Fire Departments.
- Dec. 15, 1958 Establishing Salaries for members of Police and Fire Departments — petition for referendum filed Dec. 23, 1958 — matter pending in court.
- Dec. 26, 1958 Establishing a Committee on City Property.
- Dec. 26, 1958 Fixing Compensation for Civil Engineers and Architectural Draftsmen.
- Dec. 26, 1958 Establishing Salary of the City Clerk.

Note: Chapter 630, Acts of 1958: "An Act Establishing A Traffic Commission In The City Of New Bedford" was accepted by the City Council on the 25th day of November, 1958.

ELECTIONS

During the year, two elections were held, viz: State Primary on September 9, 1958 and the Biennial State Election on November 4, 1958. At the State Primary, 24,040 persons voted and at the State Election, 44,267 persons voted, which represented 79.1% of the total registration.

Ward One was re-divided to provide for an extra precinct; namely, 1K, which became effective January 1, 1959.

GENERAL

The assistance rendered by the members of my office staff in solving the diverse problems, which are a daily occurrence, has been invaluable. The complexities of maintaining vital statistic records are expertly handled and the public is assured of every possible courtesy and assistance in this field, as well as in the other services incorporated in the duties of the City Clerk's Office. I wish to take this opportunity to thank the members of my office staff for their cooperation, and in particular, my Assistant, Miss Ellen M. Gaughan, for her valuable contribution to the efficiency of the office.

Respectfully submitted,

CHARLES W. DEASY,

City Clerk

Annual Report

OF THE

LAW DEPARTMENT

OF THE

CITY OF NEW BEDFORD

Massachusetts

For the Year 1958

January 4, 1960

To the
Honorable City Council
New Bedford, Massachusetts

Gentlemen :

There is submitted herewith the annual report of the Law Department for the fiscal year ending December 31, 1958.

This office rendered 28 written opinions during the year in addition to many informal opinions given to and conferences held with the Mayor, City Councillors, and department heads.

287 Industrial accidents were reported to the Industrial Accident Board, which necessitated filing reports and making many investigations which resulted in a number of hearings before the Board.

Many claims for personal injuries and property damage incurred as the result of defects in the highways and automobile accidents involving city-owned vehicles have been disposed of.

The Bureau of Old Age Assistance has consulted this office many times relative to payments of monies legally owed the City by children of old age recipients, as well as monies owed due to liens on real estate of recipients.

All contracts awarded by the Purchasing Department and various departments were examined and approved. All leases of city-owned property and all deeds for city-owned property sold by the City Property Committee were drafted in this office.

Much work was done in this office in connection with the new Industrial Park site. The Incinerator case was tried and disposed of in favor of the City.

Many cases were settled or tried before a jury in relation to land takings either for highway purposes, off street parking, or for the harbor development.

The following is a list of the suits which were pending in favor of and against the City of New Bedford as of December 31, 1958:

PERSONAL INJURIES AND PROPERTY DAMAGE
RESULTING FROM DEFECTS IN PUBLIC WAYS

Mary Barboza	Daniel Lysko
Victoria Davignon	Olga B. Moniz
Patricia Faria	Jennie Pina
Bertha Garrick	Grace Sheehan
Olga Gomes	Grace B. Sherman
Ellen Hammer	Julia Silvia
Angela Hayes	Arthur Smith
Dorothy Lynch	

LAND DAMAGE SUITS FOR TAKING OF LAND
BY EMINENT DOMAIN

Albert J. Goguen and Eugenie Chase - (Water Main Easement)

William McConville - (Water Main Easement)

Huttleston Apartments, Inc. - Widening West Rodney French Boulevard

ANNUAL REPORT

OF THE

CHIEF

OF THE

FIRE DEPARTMENT

NEW BEDFORD, MASSACHUSETTS

FOR THE YEAR ENDING DECEMBER 31, 1958

Milton C. Andrews, Chief of Department

—Reynolds-DeWalt

FIRE DEPARTMENT REPORT

Mayor of the City of New Bedford:—

Dear Mr. Mayor:

I have the honor to submit my twelfth annual report of the conditions and operations of the Fire Department for the year 1958 together with such recommendations as are deemed necessary for maintaining and increasing the efficiency of the department.

The total of alarms received for "Fires" and "Non-Fires" for the year 1958 is 1,286.

SUMMARY OF ALARMS RECEIVED

Fires	587
Emergency Calls	517
No Fire Found, Sprinkler Trouble, etc.	95
False Box Alarms	67
False Telephone Alarms	19
Out of the City Responses	1
TOTAL	1,286

Of the actual 587 fires, 518 originated as Still Alarms and in 68 cases were followed by Box Alarms for the original fire. Of the 587 Actual fires, 72 originated as "Box Alarms" and in 1 case was followed by a "Still Alarm" for the original fire.

Total "Still Alarms" transmitted from Headquarters	609
Total "Box Alarms" transmitted from Headquarters	243
TOTAL	852

Of the total alarms transmitted, there were 587 actual fires. There was one (1) Second Alarm during the year.

The fire loss of \$151,398.36 is about \$100,000.00 less than the loss for the year 1957, when the loss was \$251,797.51. It is also the lowest loss during the past ten (10) years when

in 1949 the figure was \$128,979.44. Also, the average fire loss during the past 20 years was approximately \$190,000.00 per year, a record of which we can be very proud and which losses can be considered as very low for a city of our size and population, — also considering the many manufacturing plants which we have. I wish, also, to point out that the number of actual fires during 1958 was only 587, a reduction of 257 fires below the 1957 figure. The total actual fires last year was 844. The average number of actual fires per year during the past ten (10) years has been 814.

During 1958, we had very few serious fires and nearly succeeded in going through the year without a Second-Alarm, the only one we had, occurring on December 12, 1958. This fire involved a 3-story tenement house at No. 499 Coggeshall Street.

There was one (1) "Out of the City" response made.

False Alarms numbered 86, the same as in the previous year 1957. This is not excessive when compared with many other cities.

The 517 Emergency or Special Calls was slightly higher than in the past few years and represents many services to the public outside of our regular fire calls.

Twelve (12) Permits for Blasting were granted during the year.

The Fire Alarm Division, under the supervision of the Asst. Supt. of Fire Alarm, Elmer H. James, has made considerable progress in making improvements and in additions to our fire alarm system. A total of ten (10) new fire alarm boxes were installed during the year, four (4) of which were placed at schools and six (6) were purchased by business firms for their use and were installed by the Fire Alarm Division. About four (4) miles of overhead wire was put up in the replacing of old wire and in preparing for new installations to be made at the public and private schools. About one (1) mile of new underground cable was pulled in replacing old, worn out cable that was causing trouble. Considerable replacing of old wood cross-arms, painting of fire alarm boxes, testing of fire alarm boxes, is going on continuously. Much valuable assistance is given to many business firms in working out arrangements for automatic tie-ins to our fire alarm office through a Master Fire Alarm Box. We arranged an automatic tie-in with the Whitman mill property, city-owned, on the sprinkler system, so that we

would get an instant alarm in case of fire. The fire alarm force assisted the Wire Department in the installation of lights at the public beach and, also, assisted with the Christmas display at the Common.

Full cooperation, at all times, is given to the insurance inspectors in relation to their work in factories, large stores, etc. Ten (10) years ago, we had 315 fire alarm boxes in use, of which 215 were public boxes and 100 were private boxes. We now have 250 public boxes, a gain of 35, and have 150 private boxes, a gain of 50, or a total gain of 85 additional boxes. All this gain, — since 1949, illustrates that considerable progress has been made and that our citizens are being provided with greatly increased protection. Improvements are going on each year and I can report our system is in very good condition.

From the foregoing, it will be noted that we have a total of four hundred (400) Fire Alarm Boxes in the city. Private boxes total 150 and public boxes total 250. Of the private boxes, 67 are connected to sprinkler systems in their properties and in the event of a sprinkler flow due to a fire opening up a sprinkler head, or due to a rupture of a sprinkler head or the piping because of a freeze-up or mechanical injury to said system, the box is automatically and immediately transmitted to our Fire Alarm Office. In addition to the sprinkler tie-in, many concerns have numerous auxiliary boxes throughout their premises from which points an alarm can be transmitted. Ten (10) occupancies have fire detectors placed on the ceiling in hazardous locations on their premises which will transmit an automatic alarm should a fire develop in said areas.

The repair and Maintenance Division, under the supervision of Master-Mechanic Kenneth M. Haddock, reports having made considerable progress in maintaining our fire apparatus and equipment in excellent condition. A major overhaul of a 1,000 gallon pumper was made during the year, involving a complete overhaul of the engine and the fire pump. New motors are put in our smaller cars, new clutches are installed, braking systems overhauled, etc., a continuing process of keeping all vehicles safe and dependable. There are thirty-eight (38) automotive vehicles in our department, subject to wear and tear, requiring a considerable amount of work to keep them in efficient condition. Eleven (11) fire stations have to be maintained, calling for much work on toilets, boilers, windows, doors, etc.

The Fire Prevention Bureau, headed by Captain Walter E. Cobb, made approximately 4,200 inspections during the year on gasoline tanks, fuel oil tanks, furnace oil burner installations, etc. One officer from the bureau is detailed to factories, continually going through them to detect and eliminate hazards therein, to try in all ways possible to make premises safe for those who work therein.

All suspicious fires are fully checked to determine the cause of the fire and to follow up with court action when necessary.

An excellent Fire Prevention Program was developed and carried out during Fire Prevention Week in October with a window display in a local store. School and club lectures with moving pictures on fire prevention were presented, a continuing educational program year after year being carried on by our bureau personnel and the school personnel.

Permits issued from the bureau are as follows:

Power Oil Burners	622
Range, cabinet, pot, portable oil burners	281
Garage and Filling Stations	12
Fuel Oil storage	45
Liquefied petroleum gas	48

TOTAL

1,008

Rummage Sale and Second Hand Licenses approved after inspection of premises — 142.

I can report the Fire Prevention Bureau as operating in a most efficient manner and that its activities play an important part in our excellent fire record and low fire loss over the years.

Deputy Chief Henry J. Fisher, District Chiefs Charles J. McKenna, Lawrence J. O'Connor, Charles J. Armanetti, Edward J. Jablonski, Daniel L. Piekut, Frank H. Cleveland, Alphonse Piekut and James E. Harwood made approximately 520 inspections during the year, investigating complaints and remedying hazardous conditions needing correction. The officers in their respective districts are frequently taken to factories and other establishments to familiarize them with the layout of the sprinkler valves, hydrants, particular hazards, etc., so as to be better prepared in relation to life safety and for more efficient fire fighting. Daily visits are made to those fire stations under their charge to receive the var-

ious reports for checking over and forwarding to the headquarters office.

They are charged with the checking of apparatus in their respective districts to see that same is kept in first-class condition, to lay out fire response routes and to advise and discuss fire department routine with the Captains and the Lieutenants under their command. At fires, they are responsible for the supervision and directing of operations in a manner aimed toward the prevention of any loss of life, both to the occupants and to the fire department personnel, and to confining the fire to as small an area as possible, and the keeping of the fire loss to a minimum.

The Deputy and District Chiefs coordinate and cooperate with the Chief to keep all fire department matters running smoothly and efficiently.

A total of 1,020 Fire Permits for burning in the open air were granted. Many visits were made to look over the premises where the burning was to be done to insure that no undue hazard was created by such burning.

Under the direction of the Deputy and District Chiefs, "In Service" fire inspections were carried on for about seven months of the year. Apparatus with a normal complement of officers and firefighters go out inspecting and during said periods they are on radio call to respond to fires. A total of 1784 inspections were made under this method by the captains, lieutenants and firefighters of the various companies. Inspections covered schools, factories, churches, garages, stores, theatres, etc., covering the entire city. Many hazards were found and corrected through these inspections. These inspection tours enable the personnel to familiarize themselves with the stairways, fire escapes, gas and electric shut-off valves and locations, the sprinkler valves, etc., in the various occupancies to which they may at any time be called. This knowledge is of considerable value to the personnel in time of fire. This continued inspection work is being carried on year after year and is definitely educating and training the owners and managers of businesses on how to prevent fires. Certainly it will play a large part in keeping our fire losses at a minimum.

I am pleased to report there is excellent cooperation from the Deputy and District Chiefs in assistance to me in maintaining a high level of efficiency in our department.

Our Drill School and training Program, under Captain Raymond G. Furness, is functioning the year round. A total

of 158 outdoor Drills were held at the drill yard and at the Coggeshall Street reservoir where pump drafting tests were made. A total of 172 drills indoors were conducted by the drillmaster during the year. Drills covered all phases of fire department work and included, — Aerial Ladder and Ladder Pipe Ladder Raising — Wet and Dry Hose Lays — Roof Ladder — Oil and Gasoline Fires — Chemox Oxygen Masks — Rescue Operations — First Aid — Knot Tying — Salvage Covering — Ventilation — Forcible Entry — and other firefighting operations as they pertain to the various work of engine and ladder companies. All Fire Hose in the department was tested at 200 pounds pressure, under supervision of the Drillmaster.

Three (3) weekly drills are also held in all stations by the company officers.

237 Officers and Fire-Fighters received the Red Cross Standard First-Aid Certificate, training conducted by Captain Furness and assisted by Lieutenant Charles J. Calnan, Jr., both who are qualified instructors. The Drillmaster attended a Radiac Course and, with Chief Andrews, attended an excellent training session at the New Haven Fire College. The Drillmaster gave drills in fire-fighting to the Naval Reserves, the New Bedford Protecting Society personnel, and certain members of the Fairhaven Fire Department. Lectures on First-Aid and Firefighting were given to eight (8) other organizations.

I can report that our training program becomes more efficient each year and is reflected in our actual fire-fighting operations.

The New Bedford Protecting Society with their modern salvage truck and with the many tools and appliances carried on same, with an active group of personnel, continue to give increased service each year. I and my fire personnel, and I am sure our citizens, are most appreciative for their services.

During the year, the following new equipment items were received:

New Fire and Rescue Boat

One and one-half ($1\frac{1}{2}$) miles of fire alarm cable for underground use.

One (1) new fire alarm register and take-up reel.

A quantity of wood Cross-Arms.

APPARATUS IN COMMISSION

- 10—Motor Pumping Engines 5-1,000 G. P. M. and 5-750 G. P. M. engines all with booster hose and water tanks. Four are equipped with built in liquid foam tanks for use in fighting fires involved with flammable liquids. Five Engines carry deluge guns.
- 1—Motor Pumping Engine — 200 G. P. M. — with power take-off pump and water tank.
- 4—Aerial Ladder Trucks — 2-85 Ft. tractor type and 2-75 Ft. non-tractor type — all equipped with ladder pipes.
- 1—City Service Ladder Truck.
- 1—Hose Wagon with Booster and Water Tank — forest fire service equipment — wet water device — flammable liquid fire-fighting appliances.
- 1—Automobile for Chief.
- 1—Automobile for Deputy Chief.
- 4—Automobiles for District Chiefs.
- 1—Automobile for Drillmaster.
- 3—Trucks for Fire Alarm Division.
- 3—Automobiles for Repair Division — 2 trucks and 1 sedan.
- 3—Automobiles for Fire Prevention Division.
- 1—N. B. Protecting Society Salvage Truck.
- 1—Automobile for towing Fire Rescue Boat.

APPARATUS IN RESERVE

- 2—Motor Pumping Engines — 1—1,000 G. P. M. and 1—500 G. P. M.
- 1—High Pressure Fog Hose Wagon, with 435 gallon water tank.

FIRE HOSE

- 800 feet of 3-inch hose.
- 29,500 feet of 2½-inch hose.
- 16,600 feet of 1½-inch hose.
- 500 feet of 1-inch high pressure hose.
- 4,500 feet of ¾-inch booster hose.
- 800 feet of ⅝-inch garden hose.
- 138 Waterproof Salvage Covers carried on apparatus.

My thanks go to the Mayor and the City Councillors who have been very cooperative.

The Building, Wire, Water, and Public Works Departments have been cooperative for which I extend my thanks.

I wish to extend appreciation to Radio Stations W.N.B.H. and W.B.S.M. for the cooperation given on our Fire Prevention Programs.

The Standard-Times Newspaper has been most cooperative in the coverage of fires and educational articles on fire prevention, etc.

My thanks go to the Salvation Army, Volunteers of America, and The American Red Cross for the Hot Coffee, sandwiches, and other refreshments served to our officers and fire-fighters at Second-Alarm and other serious fires, both day and night.

My sincere thanks to all of the Officers and Fire-fighters of our department for their wholehearted cooperation and their efforts in building the high standard of fire service to the public. We continue to strive to make our department better with the passing of the years.

RECOMMENDATIONS

I again recommend as I have since 1954, the purchase of one new 750 gallon pumping engine. I plan to assign the pumper to Fire Station No. 8, Acushnet Avenue and Davis Street, to replace the present Engine No. 8, a 200 gallon pumper now in service there. This 200 gallon pumper would make a good, reliable reserve piece of apparatus. A new and larger capacity pumper at Station No. 8 would provide better and more efficient fire protection to all of the factories, schools, etc., in that heavily congested north-end area. The two reserve pumpers which we have are obsolete, un-safe and not dependable, — one being 31 years old, the other 25 years old. Both should be discarded and removed from service as soon as possible.

I recommend the purchase of at least two new automobiles for use by District Chiefs. Two of the cars now used by District Chiefs are several years old, and definitely should be replaced with new cars. We can, if necessary, possibly get an additional two years use out of them on inspection work, etc. Cars used on fire responses need to be in first class condition, with no worn parts, etc., which could result in accidents.

In reference to the two new automobiles requested, two new 12-volt Mobile Radio Units will be required. If Civil-Defense matching funds are available, the cost could be reduced by 50 percent.

I again recommend the purchase of a quantity of new fire hose to replace old hose which becomes defective from age and use. No new hose was purchased in 1957 or 1958. It has been customary to obtain some new hose each year to insure having a proper reserve supply on hand at all times to cope with large and serious fires. Our reserve apparatus must be kept loaded with hose so that they can be manned and placed in commission by the off-shift on Second and greater alarms.

I again recommend the purchase of ten new fire alarm boxes to be placed in locations throughout the city where new home developments have been built up and where people living in said areas now have to go a considerable distance to reach the nearest fire alarm box.

A quantity of Iron Wire, Wooden Cross-Arms and related hardware will be required in the installing of the new fire boxes.

In our ten fire stations, only four stations have fairly new "Registers and Take-up Reels". Six stations are still using registers which are over forty years old. Parts on these old units have worn considerably and units should be replaced. Errors in transmission of alarms to stations can result and could create a very serious mistake and a delay of apparatus by going to a wrong location. Two registers and reels should definitely be purchased each year for the next three years to eliminate this weakness.

I again recommend for the fifth year, that the apparatus door be widened and an overhead door be installed in Fire Station No. 7 to eliminate a narrow door condition, a carry-over from the Horse-drawn apparatus days.

I again recommend that a new furnace be installed at Fire Station No. 7 to replace the old furnace which was second-hand when installed there many years ago, same having been previously used in a school. It is in very bad condition and can be expected to give out at any time.

I again repeat my request, as in former years, for the purchase of three (3) portable "Walkie Talkie Radios" for use in the department. These units are very valuable for use at many fires and practically all departments have one or more of these units.

I again recommend the purchase of a new typewriter for the Chief's office. The one in use there can then be used in the Fire Prevention Bureau for a few years longer, the one

now being used in that office being 25 years old and in a very poor condition.

I again recommend the purchase of certain Rescue Equipment to be carried on fire apparatus. This would provide us with the proper and necessary tools to be able to free or release persons involved in auto accidents, etc. These tools will enable the department to provide other rescue service under varied conditions.

I am very hopeful that the situation regarding fire alarm box protection at all schools in our city will be remedied during the coming year 1959. Very little, if anything, was accomplished in 1958 due to money not having been provided.

I recommend that sufficient funds be provided for Master Fire Alarm Boxes, also sprinkler tie-ins of those schools having sprinklers, in all of our public schools.

I again ask your consideration toward restoring the use of Aides to the District Chiefs. This method is, and has been, used in practically all cities of any size and is considered a reasonable and efficient asset to Fire Department work.

I again recommend an Automobile Power Lift for the fire department repair shop, same to be used for changing oil, repairing cars, etc. The Police and Municipal Garages have had such lifts for a number of years.

With the exception of the New Fire Station No. 5, all stations insofar as building repairs, painting, etc., both inside and outside, are in poor condition. Very little work has been done along these lines during the past twenty (20) years. Minor repairs and small painting jobs have been done by our department personnel. The Building Department has made a few minor repairs. A gutter relining job at Station No. 11 was done during the year by a private contractor. I wish to emphasize and report to you that, due to the lack of work on our fire stations, they are deteriorating more each year. I recommend that a new survey of our fire stations be made by the Building Superintendent, and that needed repairs, painting, etc., be made and done to and on our buildings.

Respectfully submitted,

MILTON C. ANDREWS,

Chief of the Fire Department.

Of the amounts "Insurance On Buildings" and "Insurance On Contents" there are Blanket Insurance Policies in both amounts amounting to \$115,496,285.00.

Total Reported Fire Loss \$151,398.36

Total Reported Insurance \$221,292,900.37

A FURTHER BREAKDOWN OF THE CLASSIFICATION OF THE FIRES
ON THE PREVIOUS PAGE IS LISTED BELOW:

Residential	Includes—Dwellings, Tenements, Apartments, Hotels, Rooming and Lodging Houses, Barns and Private Garages.
Non-Residential Assembly	Includes—Office Buildings, Theatres, Churches, Hospitals, Institutions, Schools.
Mercantile	Includes—Retail and Wholesale Trade, Restaurants, Bars, Repair Shops, Filling Stations and Public Garages.
Mercantile	Includes—Factories, Breweries, Canneries, Bakeries, Laundries, Printing and Other Manufacturing Processes.
Storage, Etc.	Includes—Warehouse, Piers, Wharves, Grain Elevators, and Storage.
Miscellaneous	Includes—All Other Buildings, Power Plants, Pumping Stations and Transformer Stations.
Grass and Brush	Includes—Grass and Brush Fires Only.
Motor Vehicles	Includes—Motor Vehicle Fires Only.
All Other Fires	Includes—Outdoor Fires, Such as Boats, Lumber Yards and Machinery.
False Alarms	Includes—Mischievous and Maliciously False Alarms.
Accidental Alarms	Includes—Smoke Scares, Honest Mistakes, Wrong Locations, Sprinkler Trouble, and Accidental Alarms.
Emergency Calls	Includes—First Aid, Accidents, Emergency Calls, Etc.
Out Of The City	Includes—Out of the City Calls Only.
Deaths	Includes—Death among Firefighters and Civilians (None during 1958)

CAUSES OF FIRES

- 7 Acetylene and Blowtorch carelessness
- 1 Arcing wires
- 2 Backdraft
- 8 Burning food
- 17 Burning soot
- 16 Burning with a permit
- 16 Burning without a permit
- 3 Careless use of inflammables
- 124 Careless smoking
- 3 Carburetor backfire
- 2 Careless use of matches
- 134 Children and matches
- 3 Combustibles in contact with gas stove
- 6 Conduction of heat
- 1 Defective and Faulty carburetors
- 1 Defective chimney
- 2 Defective wiring
- 1 Fireworks
- 6 Illuminating gas
- 1 Incendiary
- 13 Leaking oil, gasoline or kerosene
- 1 Lightning
- 1 Magnifying glass
- 4 Overheated brake bands
- 1 Overheated drying machine
- 17 Overheated electric and/or gasoline motors
- 4 Overheated exhaust pipe
- 3 Overheated fireplace
- 1 Overheated flatiron
- 10 Overheated grease
- 7 Overheated stoves, ovens or furnaces
- 5 Overheated stacks, smokepipes or chimneys
- 1 Overheated Hot Water Heater
- 1 Overheated transformer
- 11 Overturned street flare bombs
- 39 Oil burners, defective, improperly operated, flare-up, flooded
- 2 Pilot light ignited vapors
- 2 Remaining embers
- 60 Short circuits
- 4 Sparks from chimney
- 1 Sparks from finishing machine
- 6 Sparks from incinerator
- 2 Sparks from grinder or buffer machine
- 1 Sparks from stove
- 23 Spontaneous ignition
- 1 Sun's rays
- 8 Television short circuit
- 1 Undetermined
- 3 Vigil candle

**Leave of Absence*

REPORT OF THE AGENT

Administration. The problem of housing for all the facilities and activities conducted by the Board of Health in the field of public health still remains the foremost problem. The need for curtailing some of our clinic activities because of lack of space was pointed out in the annual report of the previous year. The condition remains unchanged and it is with considerable concern that the Board of Health looks upon this question of housing which has gone beyond the acute stage. Enforcement of the rules and regulations governing the installation of private sewage disposal systems has created insurmountable problems with the result that much time has been needed, particularly in the field, to adequately serve the public. The time is at hand when it will be necessary to engage additional personnel to treat of this difficult problem. At the present time, few men in the field of engineering are qualified in the State of Massachusetts to pass on these situations yet they are extremely acute not only in the City of New Bedford but in the surrounding towns as well. Sections of the city which remain unsewered are now almost as populated as those areas where sewage facilities are provided. The problem of disposing of such tremendous flows of sewage water in thickly populated areas is of tremendous public health significance.

Milk Division and Laboratory. The number of samples of water which are submitted to the laboratory for examination continues to increase. This is in keeping with the recommendations of the United States Public Health Service which sets standards for public water supplies used in interstate commerce. The complexion of the dairy industry in recent years has changed tremendously. No longer is the local milk shed able to supply the needs of the City of New Bedford. This has resulted in our going farther away from the City to provide for an adequate milk supply. The Board of Health finds itself unable to make dairy farm inspections in these far-off markets and it has become necessary to accept the inspections of the Massachusetts Department of Agriculture. We are not at this date convinced that such inspections are adequate but are unable to economically carry out our field inspections any longer in this respect. Several years ago all milk was pasteurized and processed by local milk

dealers but such is no longer the case, and milk comes into the City from plants located in Fall River, Providence and Boston. However, these processing plants continue to remain under our supervision.

Public Health Nursing. There still remain three vacancies in the Nursing Division which are filled only on a temporary basis. As time goes on, there are fewer and fewer nurses who are attracted to this work because of the much higher standard of pay in private-duty and other fields of nursing.

Refuse Disposal. It is with considerable satisfaction that steps have been taken for the renovation of the municipal incinerator which we hope will be completed by the middle of next year. This will cause great happiness in the area in the north end which has continuously been affected by smoke. The need for additional modern refuse collection equipment is more acute than ever. We now find that so-called new collection units are already eleven years old and have become so worn out as to need replacement. In addition, there are three other units of the old open-bodied type which have still to be replaced. The shortage of trucks prevents their being placed in the garage for much-needed repairs and, as time goes on, these needed repairs become major problems.

Sanitation Division. A drive was made at the end of the year to compel every single operator of an eating and drinking establishment to be properly licensed and have adequate facilities both physical and sanitary to receive our approval. In addition, no permit was issued for the operation of these establishments without concrete evidence being shown that all the personnel had food handler's certificates in full force and effect. To date, two examinations have been held for sanitary inspector by the State Division of Civil Service without any candidate signifying a desire to take the examination. It thus leaves this division shorthanded in carrying out its work of environmental sanitation.

Tuberculosis Clinic. This clinic is continuing to carry on this most important and life-saving work not only for the citizens of the City of New Bedford but also for all of the people in the towns of Dartmouth, Fairhaven and Mattapoisett. These towns have joined

with us on a cooperative basis to avail themselves of our diagnostic and clinic facilities concerning this most costly disease. Consideration was given during the year as to the feasibility of transferring patients from Sassaquin Hospital where there is a cost of \$105 per person per week to the Rutland State Sanatorium at a cost of \$60 per week. While this would mean a great saving to the City of New Bedford there were other factors which weighed heavily in postponing any decision on this matter.

COMMENTARY

An intangible but most vital and important asset which a health department must take into consideration is that concerning good public relations with all segments of the population of the city. There has been a continuing improvement in the relationship of this department with the New Bedford Medical Society, St. Luke's Hospital, School Department, Department of Public Works, Police Department, Building Department, the Welfare Department, service clubs and the general public. This has made the work of our various programs much easier and has obtained the services of many volunteer groups, particularly the Red Cross nurses' aids, private-duty nurses, doctors' wives, the wives of union officials and many others.

The Board of Health wishes to express its gratitude to all of the above-mentioned groups and others who have in any way participated in our activities, as well as to the entire personnel of the Board of Health for a year of many accomplishments.

Alphege Landreville,

Agent

ANNUAL REPORT

OF THE

INSPECTOR OF WIRES

POLICE SIGNAL SYSTEM

STREET LIGHTS

TO THE CITY COUNCIL

For the Year 1958

Reynolds-De Walt
1959

Annual Report

New Bedford, Massachusetts

April 24, 1959

To the City Council of the City of New Bedford:

Gentlemen:

I respectfully submit the annual reports of the departments of Inspector of Wires and the other two departments, Police Signal System and Street Lights for the year 1958.

In fire prevention work relative to electrical installations, it is difficult to show the results in reduction of losses to life or property because there can be no statistics on fires and loss of life that did not occur. However, it is a fact that when a fire can be traced as having started by defective wiring, it is generally found that the system had inadequate wiring, overloaded circuits, or a disregard of well established fire protection principles.

Education in the proper use of electricity to the general public, therefore, is most important and the New Bedford Wire Department staff is proud of the part it has played in this education to the public, as well as in electrical inspections, and in providing engineering knowledge for fire protection of electrical installations in this ever growing and complex industry.

The problem of personal injury from electric shock points up the diversity of knowledge necessary in the Wire Department and the inspectors must be informed on the permissible limits with respect to safety, and the safeguards necessary in the equipment used.

A report such as this would be too long if it attempted to include the various activities by classification, of the de-

partment. However, if the objective of the New Bedford Wire Department could be condensed into a simple statement, it would be to get safe electrical equipment into the hands of the public and to see that such equipment is used for the purposes designed and is properly installed.

The Wire Department is headed by Daniel F. Hayes, Inspector of Wires, William T. Bailey, Senior Assistant Inspector of Wires, John H. Dowd, Michael Gula and Hugh J. Murray, Assistant Inspectors. Mrs. Virginia L. Wheaton and Miss C. Eileen Marshall serve as Chief Clerk and Senior Clerk and Typist respectively.

The annual Municipal Christmas display was erected again on the Common, as well as a small display in front of the Library and a tree was lighted on the lawn of the Municipal Building. The decorations on the Common were the largest ever attempted with a record number of over 7,000 multi-colored lamps plus display lighting and was a success from all reports. As in the past years, the New Bedford Gas and Edison Light Company donated the current without charge to the City and the spectacle was erected with the help of the various city departments and the New Bedford Vocational High School. Civil Defense Auxiliary Police aided the local Police Department in the policing of the park during the Holiday Season.

The following is a breakdown of the work having been completed this year:

Notice for inspections	3399
Notice for television inspections	3
Wiring for new buildings	128
Wiring for old buildings	2
Alterations	82
Additional Switches	3446
Additional Sockets	2016
Oil Burners	629
Oil Pumps	30
Boarding Homes for Aged	5

Gas Burners	179
Air Conditioners	53
Outside Signs	112
Inside Signs	6
Timeclocks	7
Telephone Booths	4
Fixtures	5358
Fluorescent Fixtures	1095
Floodlights	166
Television	66
Two-wire Receptacles	5528
Three-wire Receptacles	1028
110v Motors	142
220v Motors	132
550v Motors	56
Gasoline Pumps	5

Re-inspections	212

Advisory Appointments	213
Demolitions	56
Inspections after Fires	36
Inspections completed	8615
Reports of Defective Wiring sent to Owners and Contractors	2327
Electric Incinerators	12
Certificates on rough work	451
Certificates on Oil Burners	569
Red (defective) tags	20
Permits Issued to N. B. Gas & Ed. Lgt. Co.	3032
Permits to Contractors	3470
Permits to Owners	46
Permits to Fire Prevention Department	659
House Trailers	1

During the year 103 petitions were investigated and reported to the City Council by the Wire Department relative to the New England Telephone and Telegraph Company and the New Bedford Gas & Edison Light Company. These petitions involved 92 pole locations, 20 removals, 39 transfers, 49 relocations, 9 fibre ducts, 13,348 ft. of underground conduit, 1 manhole and 449 ft. of buried cable.

Twenty seven applications for the moving of buildings were investigated and approved. These applications cause a problem whenever the buildings to be moved are over 20 feet in height. Several buildings have had to be partially dismantled or re-routed to eliminate cutting of wires and disrupting of important telephone and electric light and power lines.

The operating expenses for the year were:

General Expenses	\$2,255.57
Salaries and Wages	29,946.40
Salary-Pension	2,115.16
Christmas Decorations	5,022.36
TOTALS	\$39,339.49

POLICE SIGNAL SYSTEM

With a new switchboard installed in the Central Police Station in 1957, the service calls and maintenance costs were greatly reduced. As a result, the electricians from this department are now concentrating on other phases of this system that need corrective measures taken.

In 1958 the Traffic Signal Lights and all of their subsidiary equipment were painted. This was not only a great public improvement, but was an excellent preventative maintenance job well done. It is our hope to be able to paint these signal lights at least once every three years to properly protect this equipment.

Another program in 1958 of preventative maintenance was started but not completed on the more than 100 police call boxes located in all sections of the city. Cold weather prevented our completion of painting of these call boxes, and in 1958 this project was about 40% completed. In the spring of 1959 we will paint the balance of these call boxes and again will have completed a good preventative maintenance program.

Our underground networks of wires for this system needs wire replacement in some areas badly, although all of the system is in operational condition. In 1958 we replaced a section of bad cable on Dartmouth Street and each year we hope to complete a section of the underground system with new cable, doing the areas first that need attention the most.

With the co-operation of the Police Department, we installed a two-way radio in our Police Signal Service truck in 1958. When the Police Department installed a few new 12 volt radios in their cars, we acquired one of the old 6 volt type sets and had it installed in our truck. This gives either myself or the Police Department a better chance to contact the electricians regardless of where they are working when an emergency arises.

The Police Signal System personnel comprises Mr. Edward B. Spencer, electrician and Mr. Eugene Lorenzo and Mr. Malcolm E. Tripp, assistant electricians.

The following is a breakdown of the work done during the year:

Central Police Station Switchboard	40 repairs 50 inspections
Weld Street Station Switchboard	37 repairs 50 inspections
Police Boxes	165 repairs 158 inspections
Traffic Lights	170 repairs 110 inspections
Overhead Lines	59 repairs 11 inspections
Underground cables	25 repairs 10 inspections

In addition the Police Signal electricians were called upon to assist in dismantling the 1957 Christmas Display at the Common; Wired an M G Portable Generator set for emergency lighting; wired Police Station No. 1 with a range receptacle to plug in MG Portable Generator Sets; Installed temporary service lines overhead for block dances at the new Municipal Bathing Beaches on East Rodney French Blvd.; Placed temporary lights on a band stand each Wednesday and ran the MG Portable generator set; installed a 3 wire thermostat and wired same in the Police Station Garage at Station 1; installed a new telephone cable at the rifle range for telephones at the 200 yard zone; installed an overhead light set up at the City Paint Shop; replaced burned out lamps at the City Incinerator; installed 2 flood lamps at the infirmary pond for ice skating and worked several times on the burglar alarm system at the First National Bank.

The operating expenses for the year were:

General Expenses	\$7,889.29
Salaries and Wages	10,276.00
TOTALS	\$18,165.29

STREET LIGHTS

The Street Light modernization program that started in 1956 is still under way. Since that year new lights have been installed on the following main streets: Purchase Street and Pleasant Street downtown; Union Street downtown; Acushnet Avenue from Weld Square to Tarkiln Hill Road; Ashley Blvd. from Weld Square to Tarkiln Hill Road and Rivet Street from South Water Street to Goulart Square.

Each year as we progress with new modern lights on a planned program, we try to keep up with the demands for better street lighting in residential areas as well. Although we have improved the residential sections in many areas throughout the city, they would be too numerous to mention in this report.

In comparing old existing street lighting standards with the minimums recommended for today's heavy vehicle and pedestrian night travel, it is easy to understand why the nation's street illumination is only 7% adequate. Because of our planned modernization program on Street Lights here in New Bedford, we have taken ourselves out of this category. With the continuation of this street lighting program, here is what we are accomplishing for the citizens of our City:

1. The indisputable fact that modern adequate street lighting greatly reduces night time traffic accidents.
2. The fact that light chases crime. Men in the front line of criminal detection and apprehension will be the first to agree that street criminals move out when good street lighting moves in.
3. Modernized street lighting enhances civic prestige. Any alert, forward-thinking citizen will agree to this.
4. Another fact is that merchants appreciate the business stimulus provided by modernized street lighting and at the same time, people doing business in these areas are adequately protected from heavy vehicular traffic.

In the face of the foregoing facts, we in a position to act, are trying within our economic limits to provide adequate street lighting for these reasons, and as Superintendent of Street Lights, I have taken the position that "safe street lighting is more than a public improvement today." It is fast becoming a matter of self preservation.

A breakdown of the street light installations and the many types are as follows:

Number	Size	Yearly Cost Per Lamp
2035	100 C.P. overhead	14.40
978	250 C.P. overhead	23.88
31	250 C.P. underground (Hawthorn St.)	23.88

Trustees' Report

To the Honorable, the City Council of the City of New Bedford, Mass.

The Trustees present their One Hundred and Sixth Annual Report to the City Council in the report of the Librarian.

BOARD OF TRUSTEES,

LAURENCE G. HILL,

Clerk of the Board

Annual Report of the Librarian 1958

Since a ten year period is traditional for making comparisons and this year is my tenth as Librarian, it seems fitting to look back to 1948 and note the changes that have occurred. The following statistical table has some points of interest.

	1948	1958
New Bedford population	109,189 (1950)	105,529 (1955)
Book Circulation		
Adult Non-fiction	44,866	88,570
Adult Fiction	136,061	133,986
Children's Books	184,343	314,983
Total Circulation	365,270	537,539
Reference Questions	7,000	13,200
Registered Card holders	16,309	25,634
Total number of employees		
includes part-time and		
janitorial	58	53
Paid for salaries and		
wages	\$ 84,538.56	\$129,235.29
Books & Periodicals	\$ 13,882.12	\$ 29,551.44
Other operating		
expenses	\$ 10,368.73	\$ 21,030.17
Total	\$108,789.41	\$179,816.90

In looking at the figures on circulation and use, three things stand out; the increased circulation of adult non-fiction books and children's books, the near doubling of reference questions and the 9,325 increase in registered borrowers. All of these reflect increased use of the Library as an educational institution and information center, rather than a source of recreational reading. Television has satisfied the demand for entertainment to a considerable extent although mysteries, westerns and light romance still appeal in print as well as live or filmed on TV.

Increased circulation of children's books is, of course, at least partially a result of increased school enrollment but also reflects effective cooperation between the schools and the Library.

For the past ten years, we have used the same system of recording reference questions so there is no question of a difference in method of counting. I feel that we can all take satisfaction in realizing that the Library is being called upon more and more to satisfy the informational needs of the community. Many of the people who use the reference service never borrow a book or, for that matter, even come to the Library but it is the first place they think of to call when they need quick and accurate information.

The rise in the number of registered borrowers is very encouraging and is a direct result of carrying the Library to the people in the Bookmobile and the expansion of the branch libraries. Although a quarter of the city's population holds Library cards, by National standards the figure should be nearer to one third for a city of this size. There is ample room for improvement.

The cost of library service has risen as has everything else but it is interesting to note that there were five fewer employees in 1958 than in 1948. We now spend over twice as much for books as in 1948, thanks to the Wilks Fund. In spite of increases in salaries and wages received during the past ten years, we are still unable to attract any library school graduates at all and only an occasional applicant has a college background.

Quantitatively, the Library has an excellent record of improvement. More people are borrowing more books. More people are depending on the Library for needed information more often. This much is evident from the statistical record. Qualitatively, it is more difficult to measure improvement. Quality in library service depends chiefly on two factors; provision of the correct library materials and a capable staff willing to make the necessary connection between the material and its potential user.

For the past five or more years, we have had the opportunity, through our trust fund income and the cooperation of the city administration, to expand the Library by providing more books and better physical facilities for using them. The time has come to shift the emphasis from quantitative expansion to qualitative improvement.

Specifically, this means the continued training and education of all members of the Library staff and the active promotion of the materials and services we have to offer to those people who can and should use them. With the continuing support and assistance of the Trustees, I am sure that steady improvement of the quality of library service can be assured.

Returning to the events and accomplishments of 1958, the opening of the Wilks Branch Library on March 17th was a spectacular success. Book circulation from March 17 to the end of the year was 75,933 and over 800 new borrowers were registered. Nearly all the Library staff members worked in the new branch at one time or another the first few weeks to take care of the rush.

The open house held on Sunday, March 15th attracted over 500 visitors. Since then, many librarians and others have made special trips to see the building. The building was officially dedicated March 17th with a brief and simple ceremony with Mayor Lawler officiating in the presence of the Trustees and other city officials.

Preliminary planning for a new branch in the west end of the city was begun immediately and a plot of land 225 feet square in Buttonwood Park on the corner of Lake Street and Rockdale Avenue was transferred to the Trustees by act of the General Court. The new branch has been officially designated as the Francis J. Lawler Branch.

The Cataloging and Technical Processes Department experienced their busiest year. In addition to handling all the normal books and materials, some 5,000 new and 3,000 other

books had to be processed for the Wilks Branch. Although a start was made on this additional labor in late 1957, the bulk of this work was done in the first three months of 1958. It was a truly remarkable accomplishment.

The work of the Reference Department has been mentioned earlier in this report. It is worth noting that changes in school curriculum are reflected immediately in the work of the Reference Department. More homework, special assignments for gifted students and emphasis on supplementary source materials place a definite demand on the resources of the Library and the ingenuity of the staff in helping students.

Activities in the Children's Room continued with ten classes visiting the Library for instruction and a tour of the building, merit badges for Girl Scouts in reading and library work and visits by the Children's Supervisor to school classrooms and other interested groups. The whole Children's Department staff were of great assistance in preparing the juvenile collection for the Wilks Branch.

South Branch showed an increase of 5,483 bringing the total circulation to 59,740 for 1958. The branch needs new flooring and furniture as well as other renovation. West Branch noted a small decrease in circulation, the first since it was opened at its present address. Both branches have experienced an increased demand for reference material from seventh and eighth grade students.

The Bookmobile revised its schedule with the opening of the Wilks Branch and is now providing service to some areas previously without library service of any kind.

Personnel changes have been numerous during the year which necessitated increased on the job training. An orientation course in general library work consisting of lectures on standards of library service and a survey of libraries of all kinds was given in the latter part of the year. Films on library matters were shown and a representative of the Massachusetts Division of Library Extension spoke to the staff on the work of the Division.

Except for the publicity attendant on opening the Wilks Branch, the general public relations program of the Library has not been as active as it should be. Attractive displays of books have been made in connection with various holidays and other occasions. An exhibit of excellent cut glass was well received. If the position of Assistant Librarian, vacant for two years, could be suitably filled, I feel that more planning and continuous effort on a public relations program would be possible. In any case, our efforts will be directed toward an expansion of special library activities and promotion of library services during 1959.

I wish to express my appreciation to all Library employees for their cooperation and particularly to those who when called upon gave of their time and energy "above and beyond the call of duty". I also thank the Trustees for their thoughtful interest in promoting the welfare of the Library.

LAURENCE G. HILL,

Librarian.

CITY OF NEW BEDFORD
BOARD OF PARK COMMISSIONERS

December 31, 1958

To the Honorable City Council:

Gentlemen:

The Board of Park Commissioners, in accordance with the provisions of law, herein presents its sixty-fifth Annual Report of Parks, and its sub-divisions, Bath House, Youth Activities, Playgrounds, and Militia, for the fiscal year ending December 31, 1958.

The Board held ten regular meetings, and one special meeting, during the year, and voted to dispense with meetings during the months of July and August.

The Board organized in May for the ensuing year, elected Mr. Harrie W. Johnston as Chairman, and Mr. James M. Mendoza, Secretary.

Requests were received from the Athletic Clubs for diamonds during the season in response to a letter sent out asking that all clubs submit their schedules previous to the March Board meeting. This proved to be a most satisfactory procedure, allowing assignments to be made in advance of practice and play.

Bids for refreshment concessions were advertised in April and awarded to the highest bidder, namely, Mr. John W. Clauretie, bidding \$210.00 for the Brooklawn concession and \$1,400.00 for the Buttonwood Park concession.

The request of the Board of Library Trustees for a Buttonwood Park area at Rockdale Ave. and Lake Street as a site for a proposed West End Branch Library was endorsed and approved. Park Commissioners signed a petition sent to legislature for the land transfer.

Permission, with restrictions, was granted to Stanley A. Brown, lessee of the Municipal Golf Course, to place 500 to 1000 gallon gasoline tank and pump upon the Municipal Golf Course for the storage of gasoline to be used in equipment, such as tractors, mowers, etc. necessary for the maintenance of the course.

A new lease was executed between the City of New Bedford and Stanley A. Brown d/b/a New Bedford Public Links, covering the Municipal Golf Course located on the north side of Hathaway Road, for a term of five years, commencing January 1, 1957 and ending December 31, 1963.

The South End Little Leagues Association was allowed the right to occupy and use the land situated on the west side of Brock Ave. at the corner of Coral St. — and said lot being known as Lot 12 — for the purpose of Little League Baseball, in consideration of one dollar and other valuable considerations, for the term of five (5) years from the first day of August 1958.

For the consideration of one dollar the New Bedford Tennis Association was allowed the right to occupy and use the northerly portion of the brick building at Buttonwood Park, adjoining the tennis courts, as a shower and dressing room for a term of one (1) year from the first day of April 1958. The right to renew each year for four (4) years was granted.

Mt. Carmel C.Y.O. used the southern end of Ashley Park for their annual carnival.

New Bedford Reserve Officers Training Corps were granted the use of the parade area, including baseball diamonds and vicinity of flag pole, at Buttonwood Park for their Field Day exercises.

The Blessed Sacrament Celebration Committee made use of the Riverside Playground for their Annual Feast of the Blessed Sacrament.

The New Bedford Exchange Club held their Annual Scallop Festival on Marine Park.

The Park Department participated in the annual Kiwanis Flower Show held in the Hammond Auditorium of the New Bedford Vocational High School. Many favorable comments were received as to the arrangement and beauty of the department's display.

Mr. Anthony C. Phillips, Park Keeper at Buttonwood Park, was promoted to Assistant Superintendent of Parks, passing a Civil Service qualifying exam.

The closing of the Mary B. White Youth Center necessitated abolishment of two (2) positions, Assistant Recreation Leader and Recreation Leader (General) held by Almoner B. Delano and Ernest Newby respectively.

Appropriations and expenditures for the entire year are shown in the various tables incorporated in this report.

Respectfully submitted,

HARRIE W. JOHNSTON, Chairman
JAMES M. MENDOZA, Secretary

December 31, 1958

To the Honorable Board of Park Commissioners:

Gentlemen:

Herewith is submitted the Annual Report of the Park Department and its subdivision for the year 1958.

The general work throughout the parks has been performed by our small crew of regular employees, augmented during the busy season by seventeen temporary employees. At all times of the year we have depended on welfare recipients to help with regular men.

August 9th was officially the opening date of Storybook Land at Brooklawn Park with Mayor Lawler cutting the ribbon at the castle entranceway that led to 17 nursery rhyme exhibits and displays for children. The cherub fantasyland which included live animals and mechanical exhibits was opened from 1 p.m. to dark daily with admission free to the public.

New Bedford Post 25 Italian-American World War Veterans erected a monument in Buttonwood Park at the southeast corner of Lake and Buttonwood Street in memory of Italian-Americans who served this country in wars.

Twenty-eight multi-colored aluminum canopies were installed along the north and south side of Monkey Island pier jutting into the Acushnet River near the city-owned East Rodney French Boulevard bathing beach.

The city of Niigata, Japan, sent as a gift to the City of New Bedford, 50 Japanese peony trees of which 41 were planted in beds at Buttonwood Park. These 2 year old blooming trees are in a variety of colors including maroon, white, red, yellow and lavender.

The animal kingdom at Buttonwood Park was increased by the birth of a male buffalo. A donkey was also born and later tabbed with the name 'Gaucha'. The name, one of 1,271 proposed by the city school children, was submitted by Helen Howard of 112 County Street, who won a bicycle.

Forty-five recreational leaders supervised the city's fourteen playgrounds which opened June 23rd for a 10-week season.

The city's two municipal beaches opened on June 14th with lifeguards and male attendants on duty from 9 a.m. to 6 p.m.

Municipal Beach, West Rodney French Boulevard, was the scene of the city's annual swimming races, sponsored by the New Bedford Park Department in cooperation with the New Bedford Chapter of the American Red Cross under Executive Director, George Kay. Trophies were awarded to winners of various events.

The July 4th celebration ended in an aerial bombardment over Buttonwood Park as 31 brilliantly-hued explosive fire bombs twirled and crashed about the sky.

The concert series which included eight block dances were held during July and August at the municipal beach on East Rodney French Boulevard.

A nine week fishing program for boys and girls under 15 years of age was carried out and proved very successful at Buttonwood Park. Prizes were awarded each week through the cooperation of the local merchants.

Skaters were able to enjoy skating at Victory, Brooklawn, and Buttonwood Park this winter.

Swimming classes and safety programs which were very successful were held at the Municipal Bathing Beach this summer.

Ashley Park was covered with a sanitary oil solution to eliminate dust.

A new oil burner was installed at the greenhouse at Buttonwood Park.

Three power handles, two 22-inch rotary mowers and an edge trimmer, a 30-inch rotary mower, tractor and one set of gear reduction wheels were purchased for use within the department.

Outside of general repairs the following work was done: a chain link fence 1,284 lin-feet long and 10 feet high was installed around the tennis courts; a chain link fence 6-foot high and 150 feet long was erected to enclose the zoo area; drive-ways were graded and paved at Brooklawn, Buttonwood and Common Park, and walks were resurfaced throughout the park system.

A veritable Winter Wonderland complete with reindeer, sleigh, snowmen, a North Pole, and expertly portrayed Yule and Nativity scenes opened at the Common for the 1958 Christmas season.

To the members of the board, the employees of the department and the various department heads, I wish to extend my thanks for the cooperation given me during the year.

Respectfully submitted,
EDWARD W. BARRETT,
Superintendent

BATH HOUSE DIVISION

The opening of the Bath House on June 1, 1958, saw an attendance of 17 guards and other necessary personnel.

As in previous years all were instructed in the use of the resuscitator equipment, a most important function of life saving. First Aid courses were taken by all, and cards given out on completion.

Many children attended the swimming classes and certificates were awarded at the end of the season to those deserving. A special day was set aside for this and many proud parents saw their child receive his or her card.

The new East beach at the Fort Rodman side was extended another thousand feet this year. It received large attendance and excellent coverage by beach guards.

Compared with last year, this year's near drownings and mishaps were cut in two with regard to the number of people needing assistance. Only eighteen compared to forty-two. A record which speaks well for the personnel in attendance.

The swimming races held on August 17 saw the end of another season. The beach was closed on Labor Day, September 1, 1958.

Respectfully submitted,
MAURICE J. METCALFE,
Head Bath House Attendant
and Maintenance Man

DIVISION OF RECREATION — PLAYGROUNDS**Youth Activities — Annual Fishing Derby
Buttonwood Park**

Attendance was below last year with 124,308 children enjoying the activities at fourteen playgrounds. A few days were lost because of rain, and cloudy days kept the attendance down below normal.

Basketball was the big sport again this season, with tournaments and contests being held throughout the nine weeks of the playground season. The larger parks employed more leaders and showed good results. Forty-five young men and women were engaged to serve as recreation leaders and assistant leaders at the City's fourteen playgrounds.

Contests were held every Friday comprising doll, doll carriage, freckles, costume and hobbies. A spelling bee was held at Hathaway playground. Prizes were given to the finalists and playground leaders gave prizes to winners on individual playgrounds.

Talent shows were held weekly at all playgrounds and great results were shown.

The annual weinie roast was held for each playground with soda, ice-cream and hot dogs served. Coca Cola Bottling Company once again donated 100 cases of soda. Lincoln Park picnics were held again with two playgrounds going on the same day. Children brought their lunches and were given reduced prices on all rides and amusements.

Softball, baseball, horseshoes, running races and other sporting events were held every day, ending with the finals played off at Buttonwood Park. Showers were used moderately due to water restrictions.

Accidents were at a minimum due to all leaders having been given a Red Cross First Aid Course and instructed as to the safety on using the playground equipment.

To the merchants and individuals who in any way helped to make the season a success, I wish to express my sincere thanks and gratitude.

FISHING AT BUTTONWOOD PARK

Fishing was held again this year holding a 15 week season. Every Saturday from 9:00 A.M. to 1:00 P.M. contestants

hooked fish for a total of 2,200 fish. Grand prizes consisting of bicycles, radios and 30 additional grand prizes were awarded to winners on Derby Day. Over 400 children competed in the fishing derby.

YOUTH CENTERS

Only the West End Center was open this year, as the Mary B. White Youth Center was closed last year. Due to the closing of the White Center, the positions of recreational leaders held by Mrs. Almoner Delano and Mr. Ernest Newby, were abolished. West End had a banner year with their new basketball court, with junior and senior leagues being formed, and at the season's end all enjoyed a banquet at the Sunlight Restaurant. Dancing held a great part for the senior girls. Games were directed for the smaller children.

The Center had a good nightly attendance and parties were held every month for the members with hot dogs and ice cream being served. Members held their annual hot dog roast at Buttonwood Park.

The Carney Lodge B.O.E. held their Annual Christmas party at the Center.

Repairs were made to the pool table and contests were held for members and their guests in observance of holidays during the year.

To the Superintendent of Parks, I wish to express my thanks for the interest and support he showed throughout the year.

To my associates, I extend thanks for their cooperation, making the Youth Center a success during the year.

Respectfully submitted,

ALAN GRIMSHAW

Supervisor of Recreational Athletics

RIFLE RANGE

To Mr. Edward W. Barrett,
Superintendent of Parks

Dear Sir:

The calendar year of 1958 marked the beginning of a large rehabilitation program for the Rifle Range in matters deemed necessary for the safety of personnel and the restoration and preservation of range equipment and facilities. It is assumed that the reason is known by the higher echelon why the Rifle Range is maintained. For example, the cost to the city if a range was not available to the National Guard quartered in the city, knowledge of the Military Laws regarding the required upkeep of such a range, and the fact that the payroll for approximately 500 National Guard Personnel is an asset to the economy of New Bedford.

The following is an itemized list of work that has been completed during the year of 1958.

1. The clearing of all trees, brush, vines, etc. by bulldozing the entire area from the rear of the 100 yard target racks down range to the 700 yard marker. (approximately 12,000 square yards.)
2. Clearing wild growth of trees, brush and vines on all butts and embankments, and raking clean to enable grass to grow.
3. Killing of all Poison Ivy and Dogwood, etc., by chemicals around target carriers and butts in general.
4. Renewal of wooden target racks at the 500 and 600 yard butts.
5. Renewal of 8 target frames for the 200 yard butts.
6. Replace target carrier cords with steel cable and wire nuts to enable targets to be manipulated with ease.
7. Repairing of roof leaks in Range House.
8. Repairing of one section of 25 yard target racks.
9. Renewal of the underground electrical service between the range houses.

10. Cutting a drainage ditch across range property at two locations. Cleaning up debris and brush around driveway and parking area.

11. Printing of 500 wallet sized identification cards as range permits. Cards are issued as permanent permits, unless revoked, to reliable persons 18 years and older, to be carried on person while using range facilities.

12. One set of Rules and Regulations, in reference to safety precautions and usage of the Range as expected by the City of New Bedford, were issued with each permit, enabling the holder of each permit to be well informed of his liabilities.

The year of 1958 also showed an increase in activity and interest by the Military, the F.B.I., the Police Association and Civilians. From April thru' July, approximately 800 men in scheduled organized classes, were trained and qualified in the use of small arms. Such classes were conducted by the National Guard, Naval Detachment, F.B.I. and Police schools. In addition to this, 204 civilian range permits have been issued.

It has been the practice of this Range Officer to be at the range once a day, and on days conducive to good shooting, he has seen civilian participation in small arms marksmanship constantly.

Civilian Rifle and Pistol Clubs have inquired about conducting qualification courses sponsored by the Director of Civilian Marksmanship, Dept. of the Army. Representatives of one Regular Army detachment, one Regular Navy component, and two out of town National Guard Batteries approached this Range Officer to inquire about and inspect the range facilities for rental purposes. Due to lack of communications to the butts, it was considered not adequate at present for safety and efficiency.

I would like to express my appreciation and the appreciation of others, for the fine cooperation and interest shown by you and your Department employees in the maintenance of the Rifle Range.

Respectfully submitted,

ARTHUR LEE, SMC, USN Retired,
Range Control Officer

ANNUAL REPORT
DEPARTMENT OF PARKS
of the City of New Bedford, Massachusetts
for the year ending December 31, 1958

IN CITY COUNCIL

October 8, 1959

Received, placed on file and ordered printed in the
City Documents.

CHARLES W. DEASY,
City Clerk

Attest:

CHARLES W. DEASY,
City Clerk

ANNUAL REPORT

REMARKS AND RECOMMENDATIONS

During this year Civil Service examinations have been taken by local persons for policewoman and patrolman. When these lists are established I suggest the appointment of two policewomen and fifteen patrolmen.

We need four patrol cars to replace some of our badly worn cars and we also need two typewriters.

We need to replace our ammunition and the Federal Government says our radio station has to be replaced in 1961. This replacement would cost less than \$1,000. because Civilian Defense would help out on the cost. This radio has been in use 25 years now.

In cooperation with the International Association of Chiefs of Police, four visiting police officials from Vietnam and Indonesia were trained by this department.

At this time I wish to thank His Honor the Mayor, the City Councillors, the public, the newspapers, and the radio for their cooperation with this department during 1958.

JOHN HILTON
Chief of Police

Board Members

Leo S. Harrington

Welfare Agent

To His Honor, the Mayor, and Members of the City Government of the City of New Bedford:

The Board of Public Welfare respectfully submits its annual report for the year 1958.

It is the earnest desire of most people to be independent, to be well, and to be able to be self-sufficient. For those who do not have the capacity to provide for their own current needs, due to age, unemployment, illness, death or separation from the wage earner, or for those who do not have the ability to perform employment which yields sufficient to pay for the basic needs of the individual and his family, the community has a responsibility. This responsibility extends in helping strengthen family life and helping needy families and individuals attain the maximum economic and personal independence of which they are capable.

Public agency programs are based and conditioned by statutory laws. Legislation (both Federal and State) accounts for the present number of categories of assistance. The local Board of Public Welfare is responsible for the administration of four major programs of public assistance, namely: Old Age Assistance, Aid to Dependent Children, Disability Assistance, and General Relief. This latter program is also known by the name of Temporary Relief and/or Welfare Aid.

The first three programs (Old Age Assistance, Aid to Dependent Children and Disability Assistance) are included in the assistance facets of the Social Security Act, and they call for federal participation and also for a share of the costs to be met by the Commonwealth. The fourth type of assistance (General Relief) is almost exclusively a local function, with the Commonwealth reimbursing for a certain minority of cases, which are called "Non-settled."

On October 1, 1958, the complicated federal formulas for the separate methods of determining the federal share of money payments and for medical vendor payments, were revised with a less complicated method of claiming such federal reimbursements. The new federal formula for Old Age Assistance and Disability Assistance calls for a flat rate of \$41.50 per month per case, and

the Aid to Dependent Children maximum reimbursement is at the rate of \$20.50 per month for each parent and child included in the assistance grant.

The Commonwealth share in these same programs remains as follows:

Old Age Assistance — $\frac{2}{3}$ of the non-federal share.

Aid to Dependent Children — $\frac{1}{3}$ of the total expenditure for aid.

Disability Assistance — a combination of the Federal and the Commonwealth share to amount to 75% of the aid granted.

The balance of the cost of aid rendered in these three categories is paid for by the local communities. With the exception of the "Non-settled" cases, the communities meet the full cost of the General Relief program.

During 1958 gross expenditures for the four divisions of public assistance were \$5,172,955.07. This represents an increase of \$369,435.22 over the amount expended in 1957. Gross reimbursements from all sources amounted to \$4,168,303.90. The net cost to the City of New Bedford was \$1,004,651.17, which was a decrease of \$90,319.55 from the net cost for 1957.

A very high percentage of the case load of Old Age Assistance recipients are suffering from chronic, progressive and degenerative diseases, which require specialized and expensive medical care. The same situation applies to those who are in receipt of Disability Assistance, who, because of the nature of their illnesses, are totally and permanently disabled.

The total expenditure for medical care on behalf of recipients of all categories of assistance was \$964,651.88, a decrease of \$53,633.81 from the amount expended in 1957.

During 1958, the unit costs for medical care continued to rise. As of January 1, 1958, the new rates were certified by the Division of Hospital Costs and Finances for Hospitals and Public Medical Institutions. With the newer drugs being introduced on the market for certain specific types of illnesses, and their wide-

spread acceptance by the medical men who are prescribing these medications for their patients, the costs for medications showed an increase. However, despite the rise in unit costs, due to improved medical techniques and medication, the need for services of physicians was lessened and stays in hospitals and nursing homes were shortened, thereby resulting in a decreased cost for medical care.

Effective October 1, 1958, the Mandatory Medical Care Plan was revised by the Massachusetts Department of Public Welfare insofar as changing the method payment for nursing and convalescent home services from a split payment between the recipient and the home operator, to a vendor payment to the operator of the home.

We were deeply saddened, during the year, by the deaths of two of our associates. Mr. Alfred Lopes, a social worker with the Aid to Dependent Children division, died in August, and Mr. Louis A. Cordeiro, a Board Member for several years, died in December. Both were sincere, conscientious men, and their loss is keenly felt.

We wish to extend our appreciation to: the Honorable Mayor and Members of the City Council, Heads of other City Departments, Mr. James A. Donnelly, District Director of the Massachusetts Department of Public Welfare, and his staff, members of the staff of this department, and to the many private agencies, businesses and individuals, for their cooperation and assistance given to this department throughout the year.

Respectfully submitted,

LEO S. HARRINGTON,

Welfare Agent

GENERAL RELIEF

The following cases were granted hospital care during the year 1958:

100 House and 184 Clinic cases having New Bedford settlements.

37 House and 55 Clinic cases having no settlements.

21 House and 36 Clinic cases having Other Cities and
Towns settlements.

This is a total of 158 House and 275 Clinic cases.

The physicians attached to the Board made 508 house visits, and had 526 office visits from recipients of General Relief.

The Board of Health requested this department to procure histories and determine settlements of 80 cases.

Annual Report

OF THE

**CITY PURCHASING
DEPARTMENT**

CITY OF NEW BEDFORD
MASSACHUSETTS

For the Year 1958

THE BAKER MANUFACTURING COMPANY
- PRINTERS -
NEW BEDFORD, MASSACHUSETTS

December 31, 1958

The Honorable Mayor and City Council
City of New Bedford
New Bedford, Massachusetts

Gentlemen :

We have the pleasure of submitting to you our report for the year 1958.

The Purchasing Department has experienced its second full year, and by continuing to improve our system of operation and methods of procurement, we have been able to handle an ever increasing volume of work with our present staff.

We have continued to work closely with all of the City departments in an effort to effect for them every saving possible, and we are pleased to report to you that their co-operation has been excellent.

Your continued confidence in this Department and full support of its endeavors have provided the incentive for what has been accomplished.

Respectfully submitted,

ALBERT E. CATTERALL

Purchasing Agent

CITY OF NEW BEDFORD, MASSACHUSETTS PURCHASING DEPARTMENT

REPORT OF THE PURCHASING DEPARTMENT — 1958

The work load of the Purchasing Department during 1958, the second full year of its operation, is summarized in the schedules of Requisitions, Purchase Orders, and Contracts listed on the following pages.

The work load varied greatly during the year, with the peak in the late Spring and Summer when purchases are made of passenger cars, motor trucks, and special equipment authorized in the Annual Budget.

Efforts have been made to spread the work load by negotiating during the early months of the year for future delivery contracts for Public Works and Water Department supplies and for items in general use such as Tires & Tubes, Non-Perishable Food and Milk for the School Cafeterias, etc.

The City Ordinance provides that the Purchasing Department is responsible for procurement of all supplies and contractual services required by any department which derives its support wholly or in part from City funds, with the exception of professional expert consultant or similar contractual services. The Department is also responsible for the disposal of all surplus, scrap, and unusable materials.

The operating expense for 1958 follows:

Salaries & Wages	\$13,823.40
General Expenses	<u>1,716.63</u>
	\$15,540.03

The Purchasing Agent is often consulted on procedure, sources of supply, determination of awards, etc. by depart-

ments concerned and reviews all recommendations for contract awards before submitting to the Mayor for approval.

Since the start of the Purchasing Department purchases of items involving \$10.00 or more have been made by the Purchasing Department in the usual manner.

The major accomplishment of the Purchasing Department in its second full year of its operation has been the establishment of a procedure under which procurement has been handled in accordance with the provisions of the Ordinances of the City, thus protecting the City from such irregularities as deliveries being made without written orders, orders written from invoices, purchases divided to avoid preparing contracts, and accounts encumbered after commitments had been made.

The trend of commodity prices has continued to increase. Notwithstanding this trend, there have been many purchases for the City at prices lower than had been paid for the same items during the previous year.

Few cash discounts had been taken prior to 1957. It has been the practice of the Purchasing Department to arrange for cash discounts whenever possible, and there is record of over 400 Sellers who regularly allow cash discounts on purchases made by the City. The City Auditor and the Department Heads are fully aware of the advisability of taking cash discounts, and through their cooperation the total of cash discounts earned and taken during 1958 is enough to pay the operating expenses of the Purchasing Department.

The City is exempted by law from payment of Federal Excise Taxes and it has been the policy of the Purchasing Department to provide exemption certificates to cover such taxes where taxes may have been paid previously. Purchases of motor passenger cars, motor trucks, and other

automotive equipment are covered by exemption certificates.

CONTRACTS

Formal Contracts are required to authorize purchases of \$500. or more and 182 such contracts were written during 1958. Contracts are drawn up by the individual department heads and mailed out for the Contractor's signature after which they are returned to the Purchasing Department and processed.

Much progress has been made during 1958 in expediting processing of contract documents, but the interval from award to execution approximates two weeks and efforts will continue to reduce this interval.

No work is permitted until contract and bond have been approved by the City Solicitor and signed by the Mayor.

Many contracts were issued for future delivery on an established price basis of supplies used by various departments, resulting in uniform quality and minimum cost. Such contracts are based on total requirements with no guarantee of quantity.

When inviting bids on contract purchases and on purchases under \$500. efforts have been made to include all known concerns in New Bedford who are in a position to submit bids, and many contracts and purchase orders have been awarded to New Bedford business companies.

SOME MAJOR PURCHASES

Some of the major items for which the Purchasing Department conducted negotiations and awarded contracts during 1958 are listed below :

	Approximate Cost
Chlorine	\$ 9,035.82
Diesel Fuel Oil	6,000.00
Burial Crypts	5,441.25
Motor Oil & Gasoline	66,982.16
Road Building Supplies	267,335.30
Water Meters	40,531.80
Chain Link Fence	4,404.12
Fuel Oil & Wood	150,582.56
Coal	74,597.56
Bulk Rock Salt	2,864.73
Milk & Non-Perish. Food for School Cafeterias	171,336.45

There are many other items for which contracts have been drawn up ranging from \$500. up.

SAVINGS

There appears to be no yardstick by which over-all savings through centralized purchasing can be accurately determined. Certain definite savings over prices previously paid under similar market conditions, or prices known to be under the prevailing market, have been recorded and details are available from the Purchasing Department files. Because of the varied types of work covered by construction contracts, there is no definite basis for comparison of costs, but the wide circulation given to Invitation to Bid has undoubtedly resulted in substantial savings to the City.

ANNUAL REPORT

Purchasing Department, for the year 1958

IN CITY COUNCIL

December 10, 1959

Received, placed on file, and ordered printed in the City Documents.

Charles W. Deasy, City Clerk

Attest:

City Clerk

ANNUAL REPORT

OF THE

School Committee

AND

Superintendent of Schools

OF THE

CITY OF NEW BEDFORD

FOR THE YEAR

1958

HONORABLE FRANCIS J. LAWLER
 Mayor of New Bedford
 Chairman, ex-officio, of the School Committee

MEMBERS OF THE SCHOOL COMMITTEE

Seated: Mr. Donat F. Fortin, Vice-Chairman
 Standing, left to right: Mrs. Rose Ferreira, Dr. Paul F. Walsh, Mr. James W. Whitehead,
 Dr. John T. Barrows, Mr. W. Edward Metcalf.

School Committee 1959

FRANCIS J. LAWLER, Mayor, Chairman Ex-Officio

RUTH B. McFADDEN, Superintendent and Secretary

DONAT F. FORTIN, Vice-Chairman

Term Expires January 1, 1960

W. Edward Metcalf	407 Coggeshall St.	405 Coggeshall St.
James W. Whitehead	19 Richfield St.	261 Union St.

IN SCHOOL COMMITTEE

December 29, 1958

Voted: That the Secretary be directed to prepare and edit the annual report of the School Committee for the year 1958 and that six hundred copies of the same be printed.

The following report for the year 1958 is respectfully submitted:

RUTH B. McFADDEN
Superintendent of Schools

Office of
Superintendent of Schools
New Bedford, Mass.

December 22, 1958

Honorable School Committee
New Bedford, Massachusetts

Mrs. Ferreira and Gentlemen:

In accordance with the rules and regulations of the New Bedford School Committee, the Superintendent of Schools has prepared and herewith submits her fourth Annual Report, the ninety-eighth in a series of annual reports of New Bedford Public Schools. This edition will pictorialize and feature the activities in the departments of mathematics and science in grades Kindergarten through 12.

It is the purpose of this report to mention the important achievements of the past year and to make recommendations for improvement in our schools.

EDUCATIONAL TRENDS

The year 1958 was marked by the following important educational trends:

I. CURRICULUM STUDY AND REVISION

A little more than a year ago world developments in the fields of science and mathematics caused all school people to take a critical look at what their particular school systems had accomplished and what they were attempting to accomplish at both the elementary and secondary levels.

Criticism upon public educational systems has been nationwide. When the Russian Sputniks were placed in orbit adverse criticism descended upon public school educational systems. Faith in our scientific knowledge was re-established, to a degree, with the launching of our Explorers and the accomplishments of our atomic powered submarine "Nautilus" after cruising under the Polar ice-cap. More

confidence was gained when United States rocketmen hurled a 4-ton Atlas satellite into orbit around the earth. American scientists raised their "space sights". The United States comeback against adverse criticism seemed incredible. It had come from behind to make good previous errors. It had reclaimed its prestige.

However, just prior to Sputnik I, a steering committee, composed of administrators and teachers, was making plans to evaluate the curriculum and make recommendations for revision where necessary. The School Committee sanctioned this study.

The over-all evaluation got underway when, on January 8, 1958, Dr. Harold Gear of Boston University met with the School Committee and outlined the general plans for curriculum revision. Dr. Gear has since served as consultant.

On January 21st, at Keith Junior High School, a general meeting of all teachers was called. Dr. Gear discussed the necessity of curriculum revision to meet the ever changing conditions in education.

The Curriculum Steering Committee next organized teacher study groups in the various subject matter areas. Representative teachers from all grade levels were invited to serve on the various committees.

Specialists in the various subject areas were then engaged to consult with the following committees:

<i>English</i>	Dr. Mabel Noall, Director of Secondary Reading Clinic, Boston University School of Education.
<i>Foreign Languages</i>	Dr. Solomon Lipp, Director of Student Training and Professor of Romance Languages, College of Liberal Arts, Boston University.
<i>Mathematics</i>	Dr. Francis Scheid, Professor and Head of Mathematics Department, College of Liberal Arts, Boston University.
<i>Science</i>	Dr. Fletcher G. Watson, Professor of Science Education, Harvard Graduate School of Education.
<i>Social Studies</i>	Dr. Annabel Melville, Associate Professor of History, State Teachers College, Bridgewater.

Language Arts (1) Dr. Elizabeth V. Foster, Professor of Education and Director of Laboratory Experiences, Worcester State Teachers College.

(2) Dr. Helen Murphy, Director of the Educational Clinic, Boston University.

"The various committees, meeting on a continuing basis, are now approaching the stage where the grade placement of topics will be made." They are to be commended for the time and effort expended in reviewing and re-evaluating the content of their subject matter areas. Much study and thought has been given to revising and improving the curriculum.

Early in the next calendar year, it is hoped, a resume of the progress made on curriculum revision will be presented to the School Committee.

II. ENRICHMENT PROGRAM

Advanced courses and accelerated programs that challenge gifted children and develop their full potential powers were initiated in our school system during 1958.

In March, classes for gifted children, on the elementary school level, were started at the Keith Junior High School. Science, Language Arts, and French were included in the program. The classes met each Wednesday and Saturday. The program proved so satisfactory it is being continued through June 1959.

It is hoped when school re-opens in September 1959 an accelerated program, now being planned by the Assistant Superintendent in charge of Elementary Education and her committee, will be put into operation during regular school hours.

In September, seven so-called "Pilot" or "Accelerated" classes were started in the Senior High School. Twelfth-grade students whose grades indicated superior ability were carefully screened. Parental permission was obtained before a student was permitted to enroll in a pilot class. It is too early to predict the outcome, but the program is being supervised carefully and at a later date reports will be forthcoming.

III. *AUDIO-VISUAL PROJECTS*

The Audio-Visual Education Director in her annual report stated the year 1958 presented two great opportunities to her Department. They are as follows:

A. The Passing of the National Defense Act of 1958.

This act will make available funds for the purchase of audio-visual equipment in order that instruction may be improved. For the next four years additional funds may also be supplied for the acquisition of laboratory and other special equipment suitable for use in providing education in Science, Mathematics, and Modern Languages. In order to participate in this program, it is hoped projects may be presented that will make funds available to our schools.

B. Utilization of Programs Telecast from Educational Station WGBH — Boston.

The fact that we are to join with other communities receiving the very high type educational telecasts during the year 1959 is a challenging one. A course in in-service training for teachers to prepare classes to receive these programs and for discussion after each telecast, will be held immediately following the Christmas Holidays. It will now be possible for children to sit in the presence of a master teacher who will provide enrichment for existing courses.

Television is looked upon as a tool and supplement in the field of education and as such we intend to use it.

IV. *SENIOR HIGH STUDY*

It has been apparent from studies made by the former assistant superintendent, the principal of the high school, and the more recently appointed assistant superintendent, that the time is at hand when final recommendations for housing the increased number of students at the high school level must be presented to the School Committee for consideration and action.

Two major trends noted as active influence in the secondary school pattern as submitted in a report made by the assistant superintendent are as follows:

- A. "the increasing total senior high school enrollments :
"On October 1, 1958, 2,232 students were enrolled at the New Bedford High School in contrast to 1,506 students enrolled at the same school October 1, 1956.
- B. "the increasing numbers enrolled in the college preparatory curriculum.
"In 1940, 35% of the students chose the college preparatory curriculum, whereas, in 1958, 51% of the students chose the same curriculum.

"The study was summarized in both graphic and tabular fashion and presented to the School Committee who met on the premises of the New Bedford High School as a study committee of the whole."

A series of meetings with the Massachusetts School Building Assistance Commission followed :

- A. On September 2, 1958, three representatives of the above mentioned Commission, accompanied by school department administrators, visited our secondary school buildings and sites, paying particular attention to the existing physical set-up at New Bedford High School.
- B. On October 2, 1958, the superintendent and assistant superintendent met in Boston with members of the Commission to discuss the findings of the September meeting.
- C. On October 29, 1958, upon invitation of the Superintendent, the commission representatives met in New Bedford with the School Committee and discussed at length their previous study.

A letter received from the Administrator of the School Building Assistance Commission, dated November 4, 1958, summarized the conference of October 29, and presented the following facts agreed upon :

- A. "New Bedford's present high school building is now operating a restricted educational program

for 2,232 pupils in grades ten through twelve under unsatisfactory conditions. More than forty sections of pupils are well in excess of thirty pupils each, thus preventing adequate individual attention to these pupils' needs.

- B. "The building lacks many of the facilities needed for its present program and other facilities needed for a comprehensive type of program.
- C. "New Bedford's high school retention rate is well below the state average.
- D. "New Bedford's three junior high schools can accommodate about 3,400 junior high school pupils.
- E. "If New Bedford were to offer a comprehensive high school program, the improvement in retention rate and normal growth would indicate an expected enrollment in grades ten through twelve of about 2,500 to 3,000 pupils.
- F. "When the new regional parochial high school becomes fully staffed, the effect may be to reduce the expected public high school enrollment in grades ten through twelve to nearer 2,500 than 3,000 pupils.
- G. "The present high school building is located on an extremely inadequate site which makes any addition to the building educationally indefensible and an unwise expenditure of public funds.
- H. "The site of the Keith Junior High School is about twelve acres, exclusive of the athletic fields.

"Our study of projected enrollments, our visits to New Bedford's secondary school buildings and sites, and our consideration of the comprehensive school program typically offered to secondary school pupils in Massachusetts, suggest the following alternatives for meeting New Bedford's secondary school building needs.

- A-1. "Continue Normandin, Roosevelt, and Keith junior high schools as junior high schools to house the expected enrollment in grades seven, eight, and nine.

2. "Continue New Bedford High School as a comprehensive high school to house part of New Bedford's expected enrollment in grades ten through twelve. The working capacity of this building can be determined when space requirements are developed for New Bedford's desired comprehensive high school program. Conversion of some existing spaces in this building to spaces now lacking but necessary for the desired program will reduce the capacity to well below 2,000 pupils.
 3. "Acquire an adequate site and construct a second comprehensive high school for the expected enrollment in excess of the revised capacity of the present high school building.
- B—1. "Continue Normandin and Roosevelt Junior High Schools as junior high schools to serve about 2,400 pupils in grades seven, eight, and nine.
2. "Convert New Bedford High School to serve the balance of the expected enrollment in grades seven, eight, and nine.
 3. "Convert Keith Junior High School to a senior high school for about 2,500 to 3,000 pupils by adding needed facilities and by remodeling existing spaces as necessary.
- C—1. "Convert Normandin and Roosevelt junior high schools to junior high schools to serve pupils in grades seven and eight.
2. "Convert New Bedford High School to a comprehensive high school to house part of New Bedford's expected enrollment in grades nine through twelve. The working capacity of this building can be determined when space requirements are developed for New Bedford's desired comprehensive high school program. Conversion of some existing spaces in this building to spaces now lacking but necessary for the desired program will reduce the capacity to well below 2,000 pupils.

3. "Convert Keith Junior High School to a second comprehensive high school for the expected enrollment in grades nine through twelve in excess of the revised capacity of the present high school building by adding needed facilities and by remodeling existing spaces as necessary.
4. "Other alternatives could consist of combinations of some parts of two or more of these alternatives."

In order to adequately handle the increased enrollment in the college preparatory classes, it will be necessary before September 1959, to convert two large academic classrooms into science laboratories. It will also become necessary to utilize the auditorium as a study hall. It may be necessary also to stagger sessions in certain subject matter areas. This would result in some classes meeting daily between two and three o'clock. All of these changes would defer double sessions for one year.

I concur with the assistant superintendent's recommendation that, "New Bedford needs a second senior high school, comprehensive in nature and built on a site where future expansion can take place in an orderly fashion. We cannot afford to buy an educational product less than the best and expect it to stand the test of time."

With these thoughts in mind, I recommend that immediate consideration be given to the construction of a second high school, comprehensive in scope, offering both the academic and vocational type education. At present some of our high school students are deprived of good vocational preparation. The educational interests of all students deserve top priority.

V. *CHANGE IN ELEMENTARY SCHOOL HOURS*

On December 12, 1958, the School Committee, after a second reading, amended that part of the Rules and Regulations, Chapter I, Section 3 pertaining to elementary school afternoon sessions. The change shortens the lunch hour for children fifteen minutes and sets the starting time for the afternoon session at 1:15 p.m., instead of 1:30 p.m.

Afternoon classes will be dismissed at 3:15 p.m., instead of 3:30 p.m. as under the former rule. Teachers will be re-

quired to remain in school until 3:30 p.m., the time to be allocated for parent-teacher conferences and preparation of classroom assignments.

The rule becomes effective on January 5, 1959.

VI. REORGANIZATION

- A. On February 14, 1958 the School Committee unanimously voted to send a letter to Mayor Lawler and the City Council requesting that from eight to ten acres of land be reserved in the Clarks Point area for future construction of an elementary school.
- B. On June 20, 1958 the I. W. Benjamin, the Thompson Street and the Allen F. Wood Schools were closed, due to a decrease in enrollment, caused by a gradual shift in population. New Bedford was fortunate in having sufficient flexibility within its existing buildings to make it possible to accommodate these children in schools within three-eighths of a mile from their homes. They were assigned to the Congdon, DeValles, Greene and Ingraham Schools, thereby eliminating further use of three very antiquated buildings, costly to maintain.
- C. The construction of a new elementary school to replace the Merrimac Street, the Parker Street, and the Cedar Street Schools was taken under advisement during the year. It was hoped the following recommendations would be forthcoming:
 - 1. to take by eminent domain the property adjoining the Parker Street School on the east.
 - 2. to construct a two floor, twenty-room building facing on County street to replace the three above-mentioned schools.
 - 3. to demolish, after the construction of the new building, the existing Parker Street School thereby enlarging the present playground. Members of the Massachusetts School Building Assistance Commission surveyed the site and denied state aid because the area did not meet the requirements of the Commission for school construction. A site acceptable to the Commission requiring approximately ten acres

of land would apparently be far removed from the proposed location and consequently would involve transportation of pupils. Apparently the only way the Parker Street land could be utilized would be for the city to finance the entire cost of construction. A study of the approximate cost of this construction will be investigated.

- D. As an economy measure, a survey is to be conducted early in 1959 to ascertain the feasibility of closing the Cedar Grove Street School, built in 1883. The pupils would then be transferred to nearby schools.

VII. *SARGENT FIELD CONSTRUCTION*

On June 13, 1958 the School Committee unanimously accepted the Sargent Field Fieldhouse as recommended by Mr. Fred R. Ripley, Superintendent and Inspector of Buildings.

It was also unanimously voted that the "fieldhouse" be named, "Warren H. Doane Memorial Fieldhouse."

On September 1, 1958 the new building was used for the first time. Impressive dedication ceremonies were held on October 18th.

It is anticipated the enlarged Sargent Field playing area will be ready for total use in September, 1959.

The Doane Memorial Fieldhouse contains the following rooms:

- A. three locker rooms with a normal capacity for one hundred and fifty boys.
- B. two shower and lavatory areas.
- C. a well-equipped training room.
- D. a drying room.
- E. a squad meeting room that may be utilized for other activities.
- F. a property room adequate for storing all athletic equipment.
- G. office space for the Director.

- H. locker-room space and shower area for coaches and officials.
- I. a useful and adequate foyer.

It goes without saying that the new Doane Memorial Fieldhouse is the envy of every visiting high school squad privileged to utilize it.

The structure is a fitting tribute to the memory of Warren H. Doane, a former New Bedford High School star athlete.

VIII. FIRE PREVENTION

The Chicago school fire on December 1st caused great concern all over the country as to the safety of schools.

The State Building Inspector, Mr. Michael J. McNally, was questioned regarding the safety of the New Bedford Public Schools. I was assured that, at the conclusion of inspections by state officials during the current year, safety certificates were issued to all 34 of our public schools. Our schools had met the safety requirements laid down by the State Department of Public Safety.

The Fire Department surveyed our buildings and Fire Chief Milton C. Andrews, set forth the following recommendations:

1. secure and install a master fire alarm box on every school not having one.
2. install sufficient auxiliary boxes throughout the buildings.
3. provide an automatic tie-in of sprinklers on all schools having sprinkler systems.
4. keep fire doors in order.
5. avoid rubbish accumulation.
6. use metal barrels and metal covers.

Metal barrels are used in our schools. Metal covers have been ordered where needed.

Panic bars are already on order and it is anticipated this phase of protection will be completed in the near future.

A recommendation to install master fire alarm boxes on all schools without them is before the School Committee

at this writing. The anticipated cost is \$18,300 plus the salary of electricians employed on a temporary basis, estimated at \$2,000.

Action on the recommendation will be taken at the regular meeting of the School Committee on December 29, 1958.

MAINTENANCE

In many respects our school plant is an old one. Nevertheless, it is being modernized as fast as money and time will allow. During the past three years, continuous progress has been made in renovating many of our buildings. However, much remains to be done.

The following repairs and improvements were accomplished during 1958:

I. *Heating and Ventilation*

A. Installation of:

1. Oil burners in the High, Swift and Donaghy Schools.

B. Replacement of:

1. Steam traps in the High and Keith Junior High Schools.
2. Fifty grates in various schools.
3. Return steam lines in the Phillips Avenue, Donaghy, Clifford, Greene, Mt. Pleasant, and Ashley Schools.
4. Air lines in the Mt. Pleasant, Ashley, and Normandin Junior High Schools.
5. Re-lining of 30 fire boxes in the various schools.

II. *Electrical Work*

A. High School:

1. the lighting system was converted from direct current to alternating current.
2. new lighting fixtures were installed in 42 classrooms.

3. emergency lights were placed in the Boys' Gym and on the stairways leading from the gym to the outside doors.

B. Taylor School:

1. lighting fixtures, removed from the High School. were installed in 12 classrooms.

C. All Schools:

1. telephones, signal bells, and lights were constantly repaired.

III. *Plumbing*

A. High School:

1. the services of a plumber were often needed, especially in the cafeteria.

B. Keith Junior High School:

1. the type of urinals in this school required much care.
2. the cafeteria often had need of the services of a plumber.

C. Normandin Junior High School:

1. Several new toilets were installed.

D. Other Schools:

1. 50 copper-lined toilet boxes were thoroughly checked and renovated.
2. antiquated plumbing and water pipes, in our oldest schools, were worked upon constantly.

IV. *Painting*

A. The following schools were painted on the outside:

1. High, Acushnet Avenue and Mt. Pleasant Schools.
2. Knowlton School (Jet and dormers).

B. The Normandin Junior High School was painted on the inside.

C. A countless number of bookcases, teachers' desks and pupils' desks were stained and varnished.

V. *Carpentry*

- A. High School:
 - 1. All windows repaired.
 - 2. science tables constructed.
- B. Keith Junior High School:
 - 1. gym floor patched.
 - 2. new thresholds placed on all door openings.
- C. Roosevelt Junior High School:
 - 1. bottom weather strips installed in five classrooms.
- D. Normandin Junior High School:
 - 1. machine shop floor replaced.
- E. Donaghy and Knowlton Schools:
 - 1. new gutters installed.
 - 2. jets repaired.
- F. Congdon School:
 - 1. jet removed and replaced with lead coated copper trimmings.
- G. Clark Street School:
 - 1. classroom floor replaced.
- H. Doane Memorial Fieldhouse:
 - 1. closets built for the storage of athletic gear.
 - 2. partitions erected to form a passageway between the squad conference room and the foyer.
- I. Other Schools:
 - 1. roofs and gutters constantly repaired.
 - 2. gym floors refinished.
 - 3. 400 worn out window shades replaced.
 - 4. doors, locks, fences, stair treads, and broken panes of glass repaired.
 - 5. many bookcases and cupboards constructed.
 - 6. much furniture re-finished.

The men in the Maintenance Department are working to capacity. Although much needs to be done, it will take time to do it. This Department could use additional men.

RECOMMENDATIONS

- 1. The house lot on Brock Avenue near the Roosevelt Junior High School be turned over to the City Property Committee. The land is valueless as far as school use is concerned.

2. The City Council take over for disposal the Benjamin, the Thompson Street, and the Wood Schools. At present we are financing from our school budget the purchase of coal and the salary of a watchman.
3. Continue the installation of oil burners in two or three schools each year until all schools have been converted. The Kempton, Greene, and Dunbar Schools should be the next in line for conversion.
4. Paint a few schools each year on the outside until all have been painted.
5. Paving with blacktop the play areas at the Clifford, Donaghy and Knowlton Schools.
6. An additional electrician, carpenter, painter and plumber be added to the Maintenance Staff. The amount of work in our 34 schools warrants these appointments.
7. Two electricians be employed on a temporary basis to help install the fire alarm system recommended by the Fire Chief.
8. Continued replacement, with movable furniture, of all pupils' fixed desks and chairs.
9. The construction of a second High School, comprehensive in nature.

CONCLUSION

Since in a report of this nature space precludes giving a complete resume of the progress reports of the two assistant superintendents, the directors and the supervisors, copies of their respective reports have been submitted to each member of the School Committee. Copies are also on file in the Superintendent's office and may be perused by any interested person.

I am especially grateful to the members of the School Committee, who have given unstintingly of their time and effort, in contributing so wisely to the educational welfare of the children of New Bedford. The School Committee is vital to any success we may hope to attain.

To the school personnel my sincere thanks for their faithful assistance and their loyal cooperation at all times.

Respectfully submitted,

RUTH B. McFADDEN,
Superintendent of Schools

DEPARTMENT OF SECONDARY EDUCATION

ADMINISTRATIVE PERSONNEL CHANGES

On May 5, 1958, James R. Hayden, assumed the duties of assistant superintendent in charge of secondary education replacing Milton S. Briggs who resigned to become the head of the Business Education Department at the New Bedford Institute of Technology. In addition to his newly assigned duties Dr. Hayden retained his previous responsibilities as Director of Pupil Personnel Services. Mr. Philip Brönsiegel on November 3, 1958 replaced Mr. Charles P. Sawyer, Jr., as principal of the Allen P. Keith Junior High School. Mr. Sawyer resigned to become principal of the Apponequet Regional High School. Both of these gentlemen have been with the New Bedford Public Schools for a considerable number of years and their contributions have been far reaching.

ENROLLMENT TRENDS

High schools are not built solely for the use of one generation. Today we are using facilities provided by the builders of 1908 and 1938. The years 1968, 1978 and 1988 are a very real part of the plans made in 1958. We know now that in 1960, but one year hence, the largest class in several decades will be graduated from the senior high school. Knowing that this class is but the first of many large classes to come, it is not too difficult to predict that when this generation is married and send their children to school, our present enrollment will almost double in the next twenty years. With this in mind, it becomes imperative that additional secondary school facilities be provided now on a level commensurate with the needs of the modern technological age and one which is capable of expanding to meet future needs.

New Bedford needs a second senior high school.

CURRICULUM STUDY

The three junior high school principals are meeting with the assistant superintendent on a weekly basis for the purpose of developing policy concerning topics related to the curriculum, e. g. the organization of junior high school honor societies, student councils, tutoring problems, home-

work problems, developmental reading program and administrative problems inherent in the scheduling of classes for the academically talented. The results of discussions with teachers of the fast moving divisions of grade 7 and 8 and the teachers of college preparatory grade 9 teachers will be integrated with the curriculum study groups on the one hand and the administrative group on the other.

PUPIL PERSONNEL SERVICES

Guidance and Counseling. — Orientation of 6th grade pupils to junior high school was strengthened in two ways last Spring. The counselors who visited the elementary grades took with them 7th graders who showed a series of kodachrome slides depicting "A Day in the Life of a Junior High School Student." Three separate and distinctive sets of slides were used so that scenes shown were from the particular junior high school under discussion. The Department of Audio-Visual Education cooperated both in the production and the showing of these slides. On the basis that the 6th grade teacher had accumulated much valuable background information concerning these boys and girls about to enter junior high school, the counselors arranged for a confidential report either in oral or written form. This information was used solely to help the new student adjust to new surroundings and was not made a part of any permanent record. A further extension of the program to take the form of a 7th grade orientation day is being coordinated with the administrators of the three junior high schools.

In-service training. — The in-service training program "Evaluative Techniques" was concluded in January 1958 with 295 teachers and principals taking the final examination and being awarded certificates. Not only was this a rewarding experience to the undersigned who conducted the course, but several valuable group reports are now available as an end product. The course was organized so that the lecture to the entire group during the first hour was followed by the meeting of nineteen common interest study groups during the second hour. Three study groups concerned themselves with the three parts of the cumulative record and recommended major revisions. Their suggestions have been coordinated and a revised form is now being circulated among other interested groups prior to the submitting of the final revision to the superintendent for adop-

tion. Other valuable group studies were made in the areas of Identifying and Helping the Emotionally Disturbed Child, The Role of the Classroom Teacher in Guidance, Marking and Grading Procedures, Identifying and Helping the Gifted Child, Identifying and Helping the Child with a Reading Disability, Achievement and Intelligence Testing Procedures, and The Use of Community Social Service Referral Agencies.

Testing services. — The educational and psychological testing program has been given impetus by the installation of an IBM Test Scoring Machine in Room 203 of the New Bedford High School as of September 1958. Principals and teachers of Grade 6 who usually hand scored the intelligence tests in the Fall of the year now have this work done for them by machine. The task of scoring Grade 6 achievement tests in the Spring will also be taken over by this machine. In addition, Grade 8 and Grade 11 batteries of tests previously scored by an outside agency will now be locally scored. To indicate the breadth of the present program the following 1957-58 schedule is tabulated:

Grade 11 —	563 pupils with 19 scores each
Grade 8 —	950 pupils with 9 scores each
Grade 6 —	1279 pupils with 10 scores each
Grade 3 —	1266 pupils with 9 scores each
Kind. —	1053 pupils with 4 scores each

Statistical summaries are made on all levels, with individual pupil profiles being made and interpreted to all on Grade 8 and 11 levels.

In addition, approximately 200 individuals are screened for remedial reading, 100 pupils for speech therapy, 300 pupils for the gifted child program and another 100 individuals referred with special problems. Because the new duties of the Director of Pupil Personnel Services precluded him from actively testing individuals and groups, an assistant psychometrist, Mrs. Mary M. Winterson, was appointed as of September 1958.

Remedial reading. — Mrs. Eleanor J. O'Neil was appointed as a remedial teacher in September 1958 to replace Mrs. Ellen M. Doyle who retired. Remedial instruction

was given to 127 elementary children whose reading handicap was so severe as to prevent them from receiving benefit from the usual class room instruction. In small groups, from four to six in number, instruction was varied in time from a half hour to an hour according to the needs and the maturity of the child. Approximately forty per cent of these children were able to reach the proper reading level and be returned to regular class room work.

Speech therapy. — Miss Muriel I. Belanger was appointed as speech therapist in September 1958 to replace Mr. Andrey Konovalchik who resigned to return to his home town of Salem. Miss Belanger together with Mrs. Florence L. Mahon assume the responsibility of the correction of speech defects not associated with a hearing loss in the areas of articulation, distortions, substitutions, omissions, stuttering, delayed speech, voice problems, and organic speech disorders such as cleft palate. While referrals are received from principals and teachers, all kindergarten children are screened by means of articulation testing and diagnosis. The total number of children screened was 1,824 with 447 accepted for treatment. Of this number fifty per cent has progressed sufficiently to be dismissed within the year. Planned for the coming year are visits to all first grade classrooms giving a demonstration lesson showing the sequence of steps in speech correction. This procedure should result in greater speech consciousness and correction of the most common errors as part of the regular class work integrated with the reading program.

Audiometry and lip reading. — In cooperation with the Hearing Conservation Program sponsored by the Commonwealth of Massachusetts, the two audiometrists tested 12,907 pupils and referred 595 pupils who failed both the group and the individual tests. During the year 25 pupils were given lip reading instructions. Of this number 11 are wearing hearing aids and were instructed in their use. The auditory training phase of this program is designed to aid in the adjustment of the hearing-handicapped child to the regular class room instruction. It does not provide for the profoundly deaf child whose language facility is either entirely absent or at a minimum, having been severely handicapped from birth. A need for a specially trained teacher in this area still exists.

Summary

The present situation of American public education indicates more than ever before the necessity of informing the public, including parents, that children are truly different, that no one program or curriculum can be managed by all children. On the other hand, there is no escaping the fact that varied curricula and differentiated programs are a necessarily costly business. Hence, educators, faced with pressure groups from all sides, must emphasize that the school cannot be all things to all people. Rather, educators must know and say what they can do and be sure that much is done well.

Respectfully submitted,

JAMES R. HAYDEN, Ed. D.

Assistant Superintendent of Schools

DEPARTMENT OF ELEMENTARY EDUCATION

The New Bedford Elementary School Curriculum, like others throughout the entire nation, has undergone close scrutiny during the year of 1958. Rapidly changing times have of necessity focused the attention of educators on the need for revision of Courses of Study. Consequently, numerous Study Committees composed of classroom teachers, are currently engaged in reorganizing and revising our complete program of study.

Workshops designed to acquaint elementary teachers with material in a newly-adopted Ginn Science series were conducted on two successive days in January. The sudden awakening interest in science found many capable teachers lacking confidence in their ability to teach this particular subject. Over 300 teachers were in attendance at these sessions and were thoroughly appreciative of this opportunity to learn new skills for classroom use.

In an effort to contribute to the nationwide demand for improved reading instruction, a series of class demonstrations and conferences in intelligent news-reading were conducted in various schools throughout the city for one week in January. This was a part of our in-service training program for teachers, and teachers were released to observe lessons presented in grades corresponding to those they taught.

One of the chief problems of all elementary teachers is the subject of Reading. This year during November, Grade Three teachers were privileged to take part in an all-day Reading Workshop conducted by Miss Elizabeth Sylvester, a most capable consultant from Ginn & Company. In addition to the Workshop, Miss Sylvester devoted two days to visiting the classrooms of newly-elected teachers and advising them on the best approach to Reading problems.

National Education Week, held this year between November 9th and 15th, was a highly successful and satisfactory affair in New Bedford. Every elementary school held Open House for parents and citizens, with close to ten thousand visitors registered during the week. We are indeed grateful to have the parents exhibit such keen interest in the school program.

Arrangements for a Harvard-B. U. Extension Course were made early in 1958 and in September, thirty-four teach-

ers registered when Dr. Gene D. Phillips opened his course on "The Gifted Child" at the Clarence A. Cook School.

The realization that there was much latent talent among our classroom teachers, was the basis for the inauguration of so-called Interest Classes in various elementary school buildings. This fall, classes in French, Polish and Portuguese are being conducted once or twice a week by qualified teachers, while others are capturing the interests of children with science clubs, art classes and music appreciation. A student council has been organized in one building, while several other schools allow pupils to prepare and edit school papers.

Activities such as these mentioned, tend to make learning attractive to children, and to modernize and enliven the routine of the classroom.

Today, as never before, schools constantly have to compete with the attractiveness of television, and a myriad of other leisure activities. One of the ways in which many communities have endeavored to meet this situation is to offer homework to elementary students. Parents welcome a planned program that will guide the interest of children into worthwhile channels. Therefore, with this in mind, a Homework Committee composed of teachers representative of all grades, is now preparing plans for the adoption of such a program in our New Bedford elementary schools. By the end of January 1959, it is hoped that a Homework schedule can be placed in action throughout all elementary grades.

Parent-Teacher Associations are an indication of the awareness of school problems on the part of the parents. During the past year seven P. T. A.'s have been meeting regularly in our elementary school buildings, their major interest being the educational welfare of our children. The interest that these citizens have shown in our school problems during this past year is greatly appreciated.

As Assistant Superintendent of Schools, in Charge of Elementary Education, I am grateful for the interest and support given me by the members of the School Committee in my efforts to establish policies and to promote new activities. It is my firm conviction that the introduction of these challenging activities will make for a more effective elementary school program.

Respectively submitted,

MARY A. KENEALLY,
Asst. Superintendent of Schools

MATHEMATICS

Modern procedures in teaching arithmetic increase the pupils' understanding and ability to use numbers efficiently. At the primary level pupils are now provided with many and varied manipulative experiences that illustrate and clarify the basic concepts of number. Experiences in the modern school give rise to many first-hand problem situations, which are of great value when related to the child's present needs and interests. The alert classroom teacher knows these needs and interests and also uses the opportunities offered in the local community for actual number experiences.

Arithmetic Readiness is begun in our New Bedford kindergartens as children learn to count and touch objects in the classroom. They grow in their number knowledge through an abundance of sensory experiences, and by engaging in a variety of meaningful activities. Under the teacher's guidance our pupils continually work with numerous manipulative materials and visual aids. Classroom counting frames, flannel boards, colored beads, colored pegs, and parquetry blocks are found in every kindergarten and grade one classroom. More advanced materials suitable for fractional and measurement concepts, as well as those which assist pupils in understanding mathematical problems of actual everyday living, are in evidence in upper classrooms everywhere.

If children are to appreciate the usefulness of arithmetic, the classroom lessons must be made meaningful to them by interesting presentations. Pupils thoroughly enjoy dramatizing and experimenting as they undertake new arithmetic situations in their textbooks. Mathematical learning becomes most pleasurable when the child uses figures to arrive at conclusions on subjects that are of paramount interest to him and his peers.

Arithmetic Readiness starts in the Kindergarten.

Visual and auditory perception skills are developed in this arithmetic class.

Building understanding.

Money takes on a real meaning when we play store.

Testing Time! Learning a useful fact in a life situation.

Statistics can begin in the Primary School.

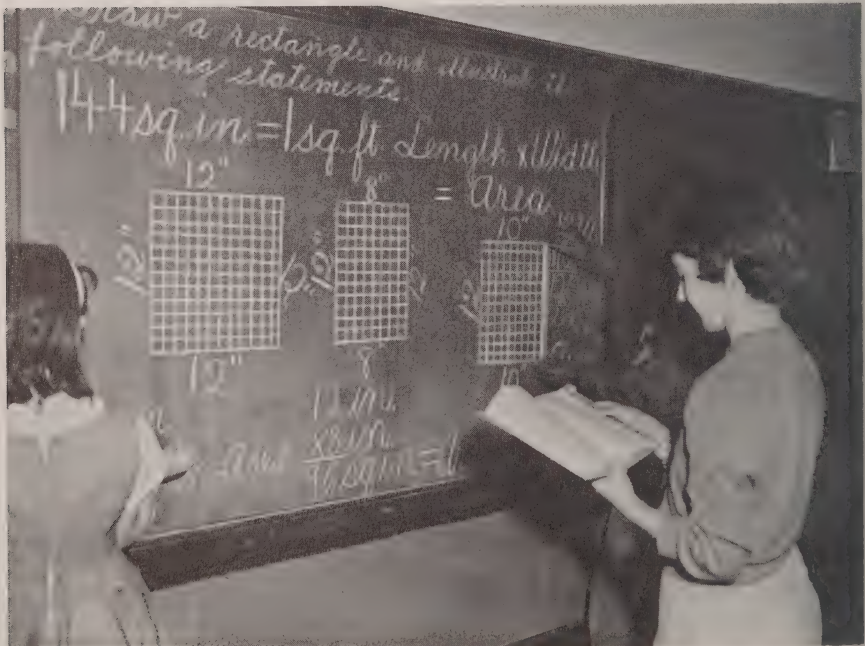

Experimentation makes sense when studying measures.

Thrift and Arithmetic meet at the School Bank.

Team-Learning in a Fraction Lesson.

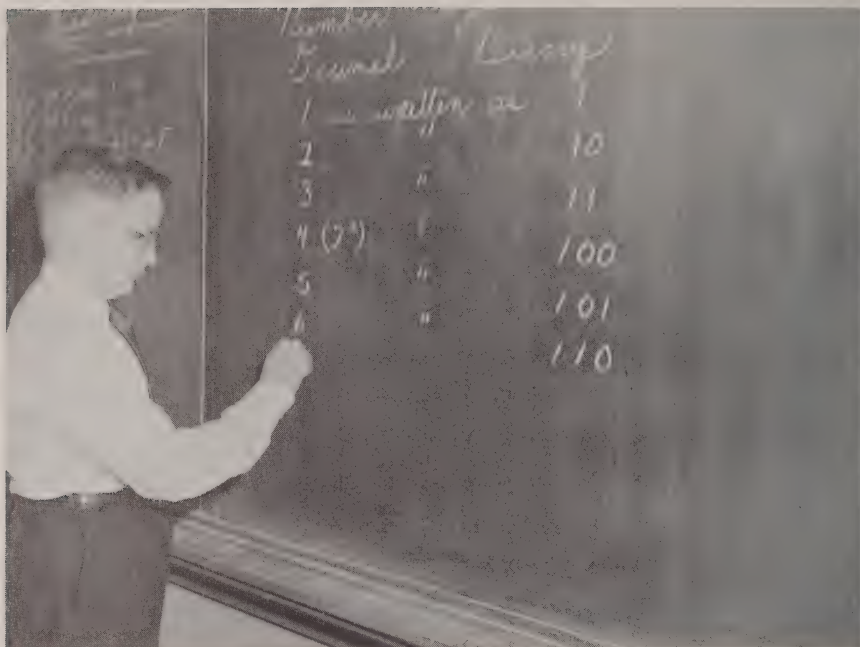

Understandings become permanent when we work out our learnings.
Blackboards often help!

In the first two years of the secondary school, grades seven and eight, the program in mathematics is a continuation of that in the elementary grades. Each pupil completes his study of the principles of arithmetic, paying special attention to the subject of percentage and its many applications. Included also are intuitive investigations of geometric forms and formulae affording the opportunity to develop an understanding of the concepts of area and volume. Particularly, in grade eight, the beginnings of abstract number relations are introduced. For the more curious minded, special reports and projects awaken a lively interest in the "world of mathematics."

The college preparatory curriculum in mathematics, beginning in grade nine, is sequential. Here the student builds and increases his knowledge of number relations in the fields of algebra, Euclidean geometry and trigonometry. In his senior year he is introduced to such advanced topics as analytical geometry, calculus, to the theory of equations and to permutations, combinations and probability. This program is basically traditional, but at all levels the fundamental principles of mathematics are stressed to enable the student to view it as a dynamic whole.

This year for the first time a "special progress" class of selected students in grade twelve has proved to be a successful experiment in enrichment and acceleration. Plans are now underway to offer this opportunity to capable pupils in grade seven through twelve.

Grade Eight Pupil making a special report on the Binary Number System — the fundamental theory for programming materials into the digital computers.

Visual aids enrich the study of arithmetic in the Junior High School.

Sine, cosine and tangent become practical terms when demonstrated by means of a homemade transit and surveyor's rod.

First year algebra students use the coordinate system to solve equations.

Members of the High School Math Club begin the study of set theory.

Future scientists are keenly interested in learning to compute with the slide rule.

A senior in trigonometry discusses variations in the sine curve with his classmates.

Beyond the textbook, into the reference library.

SCIENCE

The increasing emphasis on science in our modern elementary schools makes a continuous program from the primary grades through the secondary school a very important part of the curriculum. Children have an inherent curiosity and a spontaneous interest in natural phenomena. All of us are surrounded by events that can be explained scientifically. A well organized science program will satisfy and keep alive the child's curiosity and interest in his environment. Learning is at its best when it becomes a part of everyday living.

The children now in our elementary schools will live in a world vastly different than the one we know today. Through science, man strives always for a better understanding of the world. Children should learn that science is a powerful tool which can be used for good or evil, and they, the adults of the future, will have to make that decision.

Many excellent new science textbooks have been purchased by the School Department this past year and placed in use in classrooms throughout the city. All sorts of projects, experiments, and investigations are being carried on daily by enthusiastic youngsters and teachers. Launching of toy satellites in the kindergarten class demonstrates clearly the changing patterns of interest that are paramount in the child's world.

Science is also included in the program for our Elementary Enrichment classes, and these bright children are thoroughly enjoying the research and activities related to this subject.

This year all fifth and sixth grade classes are participating in an Educational TV program on physical and natural Science. Teachers have been furnished Guide Books and preparatory lessons precede the actual TV presentation. The value of having TV Science teachers conduct these classes, is that they have all resources and visual aids at their command that would be impossible to utilize in regular classroom work.

The science teaching in our New Bedford schools this past year has shown a tremendous resurgence of interest on the part of both teachers and students.

A Kindergarten pupil launches a Satellite — and the Science lesson is underway!

Even grade one performs science experiments.

Sound waves through different media.

Post-Television activities — TV science programs invite and inspire youngsters to use materials at hand to construct and create.

Pupils learn that they should take advantage of machines to save time and energy.

Safety practices and Electrical experiments go hand in hand in the classroom.

The Gyro Top demonstrates the principle of the automatic pilot.
 Today's young scientists will be the space pilots of tomorrow.

Young scientists learn the role of clouds in our weather pattern.

Space adventure is an exciting topic of conversation! They are living in the beginning of the space age — of rockets and artificial satellites!

A complete, well-rounded program in the field of science is offered, and for a number of years has been offered, at the secondary level. In the Junior High Schools the subject of general science presents the opportunity to survey the entire field of science for the purpose of developing interests and guiding the choice of more specific subjects on the senior high school level.

In Grades 10, 11, and 12, the New Bedford High School not only offers the traditional subjects of biology, chemistry, and physics, but also offers special classes in Senior Science, health, and biology for terminal students. Courses in physiology and biology on the senior level are given to students preparing to enter the fields of nursing or medicine. Well equipped laboratories give college prepara-

tory students the opportunity to develop the skills and techniques of experimentation under controlled conditions.

For special students who have shown unusual ability in the field of science, "Honors" classes are organized. These present an enriched and accelerated program in physics and chemistry.

Students enrolled in the New Bedford Public Schools, consistently are awarded the majority of prizes at the local Science Fair. Those going on to State and National competition acquit themselves with honor each year. Science at all levels is an active subject, not merely stressing factual knowledge, but also the inductive and deductive processes by which a body of reliable knowledge is gradually built by the inquiring mind.

Future Laboratory Technicians learn of the molecular weight of a gas.

A Study of Electrical Conductors at the Junior High School Level.

The circulatory system is studied in Health and Hygiene.

Modified Vander Graff Generator introduces the study of the atom by demonstrating Electrostatics.

Special project for the Science Fair: Identification of the Silver Group.

Purification of Water by the Distillation Process.

Identification and the study of Microorganisms.

Report of the School Committee

STATISTICS

POPULATION AND VALUATION

The population of the city (census of 1958)	102,764
Valuation of taxable property was	\$148,628,925.00
Schoolhouses and lots	10,147,300.00
Other school property (furnishings, etc.)	1,087,509.10

APPROPRIATIONS

Rate of taxation (per \$1,000.00)	\$65.20
Amount for general school purposes not including new buildings	\$4,103,039.99*

*Includes \$41,349.45 spent from building repair loan.

SCHOOL CENSUS

Number of children between five and sixteen years of age, and illiterates (not having completed Grade 6) between sixteen and eighteen years of age, reported by the Attendance Department in accordance with the census taken October 1, 1958.

Between 5 and 7 years	3,642
Between 7 and 16 years	15,105
Between 16 and 18 years	109

TUITION RATES

Rates of tuition for non-resident pupils for school year, beginning September 3, 1958, payable quarterly in advance are:

High School	Year	\$375.00
Junior High	}	Year
Sight Saving		
Special Class		
Work Shop		
Elementary	Year	250.00
Kindergarten	Year	125.00
Sol-e-Mar	Day	4.00
Evening School	Night	.50

PER CAPITA COSTS

The cost of instruction per scholar for Day Schools is based on the average number belonging and the total amount expended from taxation money, not including expenditures from the Sylvia Ann Howland, Paisler, Bourne Prize, or Etta Abbott Smead Funds:

	Gross Cost	Net Cost (after state reimbursement)
High School	\$322.72	\$266.26
Junior High Schools	257.72	195.97
Elementary Schools	287.58	237.75
Average for Day Schools	285.70	232.44

The average cost per pupil in the Day School, for text books and supplies, has been as follows:

High School	\$10.83
Junior High Schools	8.27
Elementary Schools	6.49
Average for Day Schools	7.43

RECEIPTS AND EXPENDITURES

IN MEMORIAM

LOIS CHACE

Teacher

1936 — 1958

EDNA M. EGAN (Mrs.)

Teacher

1919 — 1939

1945 — 1958

Following are the names of teachers and other school personnel who have left the service or who have been appointed to the department during the year 1958.

RETIRED

Teaching Personnel

Helen L. Ashley	Gertrude A. Lyons
Ruth H. Cady	Frances V. Maher
Stella Caouette	Helen A. Malone (Mrs.)
Mary P. Corey	Ethel M. Minier
Elizabeth B. Crook (Mrs.)	Anna G. Riley
Ruth R. DeSousa (Mrs.)	M. Evelyn Rutter
Ellen M. Doyle (Mrs.)	Mary E. Sanford (Mrs.)
Florence A. Francis (Mrs.)	John Sharp
Mary E. Francis (Mrs.)	Alice C. Sheerin
Ruth A. Howard	Isabelle E. Sullivan
Cora M. Jason	Laura P. Sullivan (Mrs.)
Beula M. Lentell (Mrs.)	Edith H. Valentine (Mrs.)

Flora Vieira

Civil Service Personnel

Mary Guyette	Elmo A. McAuliffe
Louise Haegele (Mrs.)	Rocco A. Morra
Florence R. Kilpatrick (Mrs.)	Mary E. Perrin (Mrs.)

RESIGNED

Teaching Personnel

Norma Aubertine	Maria S. Lopes (Mrs.)
Jacqueline Auger	Roberta McHugh
Elizabeth H. Best (Mrs.)	Bernice Mickelson (Mrs.)
Milton S. Briggs	Winifred G. Murray
Harold Cornforth, Jr.	Sylvia F. O'Donnell
Edward A. Cormier	Albert Palmieri
Mary E. Crosby (Mrs.)	Zoe Pappas (Mrs.)
Grace Flood (Mrs.)	Marian R. Parsons (Mrs.)
Gerard L. Fortier	Virginia J. Pelczar
Lorraine Gacek	Lucille L. Pimentel (Mrs.)
Margaret A. Hagen (Mrs.)	Louis J. Robitaille
Marion S. Hamblett	George A. Salvador
Vivian M. Kellick (Mrs.)	Charles P. Sawyer
Andrey Konovalchik	Rita A. Sheerin (Mrs.)
Gregory Konstantakos	Louise P. Smith (Mrs.)
Lucille B. Lagasse (Mrs.)	Margaret Tavares (Mrs.)
Maryann Williams (Mrs.)	

Civil Service Personnel

Lena Barrett	Eleanor Houghton (Mrs.)
Doris H. Brownhill	Ann O'Brien (Mrs.)
Claire D. Economos (Mrs.)	Benvinda Roderick (Mrs.)

APPOINTED

Teaching Personnel

Ellen T. Andre	Dorothy Lewis
Paul Anthony	Margaret M. Moreau (Mrs.)
Muriel I. Belanger	Constantine Nanopoulos
Raymond L. Blanchard	Alice M. Porter (Mrs.)
Mary H. Botelho	Kenneth A. Prue
Elaine Burke (Mrs.)	Patricia V. Reiniche
Russell E. Burns	Ellen E. Rex (Mrs.)
Betty Ann Butts (Mrs.)	Jean B. Riley
Alice Cardoza	Francis Roberts, Jr.
Dorothy E. Cook (Mrs.)	Joan A. Rodman
Winifred G. Creed	Thomas B. Ryan
Gladys De Almeida	Annette L. St. Pierre
John F. DeMello	Richard Saunders
Nancy Duarte	Stella L. Sawicki (Mrs.)
Angeline W. Forrest	Virginia Schenk
Gerard L. Fortier	Doris Seguin (Mrs.)
Anthony V. Freitas	Myrtle D. Simas
Shirley M. Geary	Carol B. Smola
Irene A. Gomes	Gilbert A. Souza

NEW BEDFORD, MASSACHUSETTS
1959

COMMISSIONER'S REPORT

March 6, 1959

To the Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen :

I submit herewith my annual report of the operation of the Department of Public Works for the year ending December 31, 1958.

Appropriations and expenditures for the entire year are shown in the various tables, together with a chart giving the comparative Highway expenditures covering the period from 1922 to 1958 inclusive.

STREET CONSTRUCTION: Bituminous concrete, bituminous macadam, and bituminous gravel streets were constructed to the extent of 284,747 square yards or 14.7 miles and 8,165 lineal feet of all types of curbing was laid. The practice of laying one course of Type I bituminous concrete over existing pavements was continued.

Old tar walks and dangerous flag walks were replaced with bituminous concrete to the extent of 21,235 square yards. Under the Betterment Act, 5,760 square yards of Portland cement concrete and 1,015 square yards of black-top walks were laid. Walks done privately by Bonded Contractors and paid for by the owners are not included in the above totals.

The practice of sealcoating existing pavement with bituminous material and sand or stone chip cover was continued to the extent of 7.1 miles. I firmly believe that this procedure of preserving our existing streets is the most important work that the Department of Public Works does during the year. No other operation saves so much at such

a small cost. Eventually, I hope to extend this operation to bituminous concrete sidewalks.

Under Chapter 718, Acts of 1956, the City of New Bedford completed work on the following streets:

Mill Road - Tarkiln Hill Road to Belleville Avenue
Hillman Street - Purchase Street to Ash Street
Shawmut Avenue - Robeson Street to Durfee Street

Money remaining from these projects and others (done in 1957) will be combined and applied to some worthwhile project in 1959, agreeable to both the City Council and the Mayor.

Under the Chapter 90 program, Rodney French Boulevard West from David Street to Rodney French Boulevard South was widened and rebuilt, a distance of 6,337 feet. This work was done by contract under the supervision of the State Department of Public Works Engineers and was financed $\frac{1}{4}$ by the City, $\frac{1}{4}$ by the County, and $\frac{1}{2}$ by the State.

Widening and reconstruction under Chapter 90 was also begun on Rodney French Boulevard East from Rodney French Boulevard South to Ruth Street. This work will be completed in 1959.

Part of Braley Road, west of Phillips Road, and a large section of the Industrial Park Road were built with Industrial Park Funds under the direction of a private engineering concern. The total length of this project amounts to 9,949 lineal feet. These streets are included in the total of 14.7 miles of streets built in New Bedford in 1958.

The construction and maintenance ability of the Department of Public Works has increased greatly in the last few years. We now have experienced men in almost every phase of our many departmental operations (Engineering Division excepted).

SEWER CONSTRUCTION: New sewers and surface drains were laid to the extent of 7,585 lineal feet. 1958 showed a marked decrease in the demand for sewer extensions. Once again, the Department of Public Works completed the year with no outstanding sewer or surface drains on order from the City Council.

EQUIPMENT: The Department of Public Works received in 1958 two dump trucks for the Highway Division, two power saws for the Forestry Division, and three snow plows.

The department, at the close of 1958, has on hand 13 trucks and 9 pieces of miscellaneous equipment over 10 years old. A general replacement of most of this equipment would be a great savings to the City in repairs.

At present, the department is operating two power sweepers instead of three. One of the old sweepers of 1935 vintage had to be disposed of in 1957, due to the impractical nature of repairs necessary. A new sweeper to replace the one disposed of would be a valuable asset to the City.

SNOW AND ICE CONTROL

Three new plows purchased by the City in 1958 strengthened the city plowing force considerably. One of the new units was mounted on a Board of Health Packmaster, bringing their plowing units up to seven. The other two units were mounted on Highway trucks, replacing old equipment.

The City's fleet of truck plows now consist of 21 units (all City owned). Two of these trucks are also equipped with automatic sanders which have proved their worth countless times over the past two years. The City also owns two graders which are used for plowing in the downtown area.

Besides the City's fleet of plows, the department hires all the available private snow plowing trucks within the City. At the present time, there are six contractors supplying six plow trucks and two graders. This is a considerable loss over prior years when private contractors supplied between twelve and fifteen units. Apparently the wear and tear on trucks during plowing operations has caused private contractors to avoid this type of equipment rental.

For the removal of snow, the City owns six front end loaders. These machines are ample for the loading of snow, but the City must hire a major portion of the trucks used to haul the snow away.

ASH COLLECTION: The collection of ashes has, over the years, actually become principally the collections of cans, bottles, grass, leaves, and brush.

The more bulky nature of this material has made less practical the use of the ash collector type bodies that are now being used in New Bedford as these bodies do not compress their loads, and as a result do not carry a full load by weight.

As a result of this it would seem that a compressor type body as used by the Garbage Disposal Division of the Board of Health would be necessary for future equipment replacements.

There are, however, other problems involved in this operation which could lead to the necessity for a complete revamping of the entire ash collection program. I believe this will have to be done within the next few years after completion of the new incinerator now being built at the City Dump. This new incinerator may make possible economic advantages in the revamping of the entire collection and disposal system.

BRIDGES: Coggeshall Street Bridge - This bridge is in urgent need of replacement. Hurricane damage to this

structure was severe and repairs made after the hurricane did not bring it back to its original condition as the sub-structure was not completely repairable. The action of the elements since this time has further weakened the bridge until today the safe load capacity is at a minimum. The Coggeshall Street Bridge is $\frac{3}{4}$ maintained by New Bedford and $\frac{1}{4}$ maintained by Fairhaven.

The Slocum Street Bridge (Wood Street) is apparently sound. The only fault with this structure is the deterioration that has occurred to the iron railings. It will be necessary to replace these railings in 1959. The Slocum Street Bridge is $\frac{1}{2}$ maintained by New Bedford and $\frac{1}{2}$ maintained by Acushnet.

FORESTRY DIVISION: The Department of Conservation, Division of Pest Control requirements with regard to Gypsy Moth and Dutch Elm Disease were complied with. Considerable work was done topping trees, removing stumps, cutting brush, spraying, and trimming.

Public interest in the welfare of the roadside trees is lacking. There appears to be no citizens group or even many individuals generally interested in the saving of the trees now existing on City streets. Only about one tree removal petition in thirty meets with any type of objection from the public.

The Forestry Division through the years has maintained some of the roadside trees only under the most difficult conditions. Many petitions for removal are denied because of insufficient reasons for removal but yearly the situation becomes more serious.

With public interest increasing toward the removal of trees and the deadly effect of tree blights and diseases, the City is gradually headed toward an era where roadside trees will be a thing of the past. Only careful study, stricter rules, and public support can save them.

ENGINEERING DIVISION: The extensive work of the Engineering Division may be noted in a separate section of this report. All the departments in the City rely on information obtained from this division.

Only two men capable of handling any type of engineering problem remain in this division and only one of these men can handle all of the different types of work involved.

It has become necessary to send the office men out in the field to do any surveying work that may be necessary. Two years ago, we had two crews working in the Field almost year round.

As recently as last year examinations were held, open to the entire State, to fill vacancies in the Grade III Civil Engineering categories. Only two passed the examination and both of these men declined appointments.

The State of Massachusetts Department of Public Works seems to attract most of the capable men in this field due to the high salaries paid plus many other benefits not available here in New Bedford.

The continuation of this lack of trained personnel can only lead to serious errors, poor records, and the general slowing down of functions of all departments that depend on the Engineering Division.

SEWAGE DISPOSAL DIVISION: A great deal of difficulty was encountered during the year with industries engaged in processes involving the dyeing of wool. Waste from this process dumped into the sewer solidifies in the cooler water of the sewer. At one point in 1958 the outfall chambers of Fort Rodman became so clogged with this substance that a serious back pressure on the interceptor developed. To relieve the situation, it was necessary to cut the top off these concrete chambers with jack hammers and remove the solids with a crane.

Efficiency could be gained and the Sewage Disposal personnel reduced by three men by installing automatic screens and a hydraulic press at the main screenhouse on Rodney French Boulevard West. Presently, it requires a man continuously to rake the screens and then shovel the sludge into a truck for disposal. Further difficulties with the disposal of the sludge from the screens will be encountered when the new garbage plant incinerator is completed as I understand this material cannot be burned without first having its water content reduced by drying or compressing.

Much work was done by the Sewage Disposal personnel in keeping siphons, manholes, float chambers, and tide gates operating, plus the flushing of sewers of low velocity flow. The buildings and grounds were kept painted and in good repair and 164 cubic yards of sand was removed from the main tube through the operation of the sewer drag machine.

The seven pumping stations in the system handled an average flow of just over 10,000,000 gallons per day during the year. This amount of sewage represents approximately 40% of the total flow in the system.

GENERAL: New Bedford is one of the older cities in the country and like most old cities has what is commonly known as a combined sewer system (about 70% of City). This means that the sanitary sewage and the surface drainage flow through the same pipe. This also means that much of the street debris washed into catch basins along the sides of the street eventually finds its way into the main interceptor sewer.

Sand and grit entering the sewers usually is carried along in the smaller pipes on side streets by the high velocity flow in these pipes due to the steeper grades at which most of these pipes were laid. This grit is carried through the pumping stations or directly into the interceptor (in cases of gravity flow). The grit going through the pumps

causes tremendous wear on the pump impellers and shafts, but the greatest difficulty is caused by the grit deposited from the flowing sewage when it enters the large interceptor tube. This grit deposits out of the sewage at this point because the flow is much slower in the interceptor. The size of a grit particle that can be suspended in a flowing liquid decreases as the velocity of the liquid flow decreases. The fine materials therefore deposit out of the flowing liquid at a point of least velocity. This situation occurs in numerous places in the City but most critically on Acushnet Avenue between Wamsutta and Logan Streets. If this sand and grit deposit rises above the incoming laterals on any side street, the laterals will be blocked and the houses and business establishments served by that lateral will have sewage backing into their cellars and bathrooms. This condition could become chaotic.

It is because of the reasons noted above that cities such as New Bedford must be cautious on the use of sand for street sanding purposes in the winter months. A great deal of salt and calcium chloride must be used by the Street Department crews on icy pavements either without sand or in a very rich mixture of chemical and sand. As both salt and calcium chloride are a natural white color, these chemicals are not easily distinguishable by the eye when spread. As a result of this, the department is often accused of not treating an icy street condition, when actually the reverse is true.

MISCELLANEOUS: The Department of Public Works graded and installed drainage on the new school athletic field, east of the Keith Junior High School on Hunter Street. In this manner, it was possible for the School Department to contract for the loaming and seeding of this large tract of land in order that the grass could be planted by the Fall of 1958.

The usual work by the department was performed in

assisting various celebrations, collections, regattas, festivals, displays, and other civic functions in order that they might be a success.

I take this opportunity to express my appreciation for the cooperation that I have received throughout 1958 from the various department heads and my own capable assistants in carrying on the work of the department.

Respectfully submitted,

NATHAN S. ELLIS

Commissioner

ENGINEERING DIVISION — 1958

AIRPORT COMMISSION — Plans were drawn and surveys made in connection with aviation easements and various other projects.

ASSESSORS — 1857 Real Estate transfers were recorded and indexed, 144 Probates checked and recorded and 240 plot changes were made. New streets were added to the plats and thirteen new plats were drawn.

BOARD OF APPEALS — Thirty surveys and plans were drawn and records kept.

BUILDING DEPARTMENT — Lines and grades were given for 151 new buildings. The buildings were numbered and records kept.

CHAPTERS 81 and 90 — The Engineering Division co-operated with State and District Engineers before and during the construction of the relocating of Phillips Road, and for proposed projects on Rodney French Boulevard and Church Street.

CURBING — Lines and grades were given for setting 8,165 linear feet of curbing. Inspection and measurement was made of the same.

HARBOR DEVELOPMENT COMMISSION — Plans were drawn and surveys made for the development of the new industrial area along the waterfront.

HOUSE DRAINS — One hundred and twelve (2800 feet) new house drains were laid connecting house sewer and surface pipes with the main sewer. Locations of these drains were measured, records were made of the same and drawn on drain plots.

INDUSTRIAL PARK — The Engineering Division worked in close cooperation with private engineering

companies in the development of the Park.

PLANNING BOARD — (Zoning) Three plans for zoning changes were made and lists of abutters made and reported.

PARKING METERS — Five surveys and plans were drawn for new meters and removal of meters. Surveys were made for No Parking signs and laying out stalls for No Parking areas.

PARK BOARD — Plans and surveys were made for new park areas, playing fields, and beaches.

SEWERS — Surveys, plans, lists of abutters, assessments, contract plans, and specifications were made for nine new sewers and surface drains. Construction costs, inspection, lines, and grades were given for 3,327 feet of sewers and 4,258 feet of surface drains. Records of construction, final plans, and final assessments were made and reported.

SIDEWALKS — Surveys, plans, and estimates were made for ten projects under the Betterment Act. Measurements, records, final plans, and assessments were made and reported. Plans and estimates were made for 223 projects laid by bonded private contractors for property owners.

STREETS — Surveys were made and plans drawn for the acceptance of fourteen new streets, nine widenings, one discontinuance, and three alterations of grades. Lines and grades were given for all street construction and public utilities construction. Surveys were made and points set for the installation of new street bounds.

TRAFFIC COMMISSION — Surveys were made and plans drawn. Traffic counts were made at forty-one intersections. The yearly traffic report was made and the yearly traffic accident map was made. Surveys were made for the control of traffic.

WATER BOARD — Lines and grades were given for all water main extensions. The Engineering Division worked in close cooperation with private engineering companies in the taking of easements and laying out the new water main from High Hill Reservoir into the City.

MISCELLANEOUS — Lines and grades were given for fences, street lines, and sidewalks. Sixty-one accident or damage sites were surveyed and photographed. Plans were drawn to prepare for possible court action. Numerous plans were drawn and descriptions prepared for study by the City Council, Council Committees, and the City Solicitor.

Weather records were kept daily on rainfall, snowfall, wind velocity, temperature, and tides. This weather information was reported to State and Federal agencies and was made available to the public. Records were kept of street sweeping and ash collections. The area of cuts in pavements and walks were measured and recorded. City maps and plans were kept up to date, blueprinted, and indexed.

GENERAL STATISTICS

January 1, 1959

Set off from Dartmouth	1787
Incorporated as a City	1847
Length of City	10.78 miles
Breadth of City (Maximum)	3.10 miles
Highest point	1250 feet north of Rockdale Ave. and Hathaway Road. Elevation 181.50 feet

WATER BOARD REPORT

June 5, 1959

To the Mayor and City Council
of the City of New Bedford

Gentlemen:

In accordance with the provisions of Chapter 25, Section 12 of the City Code of New Bedford, the Water Board herewith respectfully presents this, its eighty-ninth annual report, covering its operations for the calendar year 1958, and including the reports of the superintendent and water registrar.

The total water consumption during 1958 decreased about one-third of a billion gallons as compared with that for 1957, a drop of approximately 5%. Sharply contrasting weather in the two years is believed to account for nearly all of the drop. Whereas the year 1957 was one of the driest on record, the year 1958 with a rainfall of 61.97 inches was one of the wettest. Frequent rains throughout the summer sharply decreased the use of water for lawn sprinkling and similar purposes in the past year.

The 42 inch reinforced pressure concrete transmission line from High Hill to the corner of Park and Smith Streets was formally accepted under date of July 12, 1958. After it had been placed in use, pressures throughout the city were gratifyingly improved. Pressures at any time during the week do not fall more than six or seven pounds below the maximum static pressure which usually occurs during the night over the weekends.

A statement of expenditures through December 31, 1958 from the \$1,800,000 Bond Issue for this project will be found in the report of the water registrar.

During the year, negotiations were initiated with the City Government of Fall River by Mayor Lawler looking toward relinquishment by the City of Fall River of its rights to water in Long Pond, in return for reimbursement for expenditures made by that city toward the development of the Lakeville Ponds under Chapter 400 of the Acts of 1924.

The following abstract from the water registrar's report shows in condensed form the financial operations of this department during the year. Full details will be found in his report, which accompanies this.

FIRST, BASED ON THE BUDGET SYSTEM IN ACCORDANCE WITH CITY'S AUDITOR'S ACCOUNT

	Salaries & Wages	Labor	Gen. Expense	Pensions	1957 Enc. Acct.	Total
1958 Budget	\$128,000.00	\$130,000.00	\$135,000.00	\$19,538.77	\$8,924.83	\$422,634.38
Misc. refunds			170.78			
Transfers	6,000.00	5,000.00	—10,000.00

1958 Expenses	133,458.67	133,936.03	120,280.10	19,538.77	8,598.07	415,811.64
	541.33	1,063.97	4,890.68	326.76	6,822.74
			4,474.50			4,474.50
Less: unexpended balance 1958						
Balances reverting to Gen. City Funds						
as of December 31, 1958	541.33	1,063.97	416.18	326.76	2,348.24

SECOND, BASED ON RECEIPTS AND EXPENDITURES

RECEIPTS

For water, meter rentals, demands and charges	\$687,367.81
Miscellaneous receipts	32,663.38
Receipts from 1955 Bond Issue	1,166,812.81
Receipts from 1956 Bond Issue #1	10,109.45
Receipts from 1956 Bond Issue #2	57,141.47
Total receipts	1,954,094.92

EXPENDITURES

Management and repairs from appropriation	\$ 128,878.17
Management and repairs from Bond Issue	1,234,063.73
Payrolls from appropriation	286,933.47
Interest	79,411.67
Bonds	153,000.00
Total expenditures	1,882,287.04

Balance reverting to General City Funds, Dec. 31, 1958

The total outlay for the construction of these works exclusive of debt, interest, management and repairs through 1957 was	71,807.88
Less — Credits of \$40.68 omitted in 1957 report	8,948,884.48
	—40.68

Actual Outlay

	8,948,843.80
INCREASE	
Payments	1,237,716.77
Credit	22,309.21
Net	1,215,407.56
Net cost of works, December 31, 1958	10,164,251.36

The following is a statement of Receipts and Expenditures for the past nine years.

RECEIPTS AND EXPENDITURES SINCE 1949

Year	Receipts for Water	Total Receipts	Maintenance Interest and Bonds	Extensions Paid from regular Receipts	Extensions Paid from Bond Account	Returned to General City Funds	Total Expenditures

REPORT OF THE WATER REGISTRAR

City of New Bedford
Water Registrar's Office
Dec. 31, 1958

To the New Bedford Water Board:

Gentlemen:

I herewith present to you a detailed statement of the receipts and expenditures of the Water Works Department for the year ending Dec. 31, 1958.

The report is based on Budget vs. Expenditures and also on Receipts and Expenditures as previously.

RECEIPTS

FIRST, based on the budget system

Budget Appropriation	\$393,000.00	
Refunds	170.78	
Transfers	1,000.00	
Pensions	19,538.77	
1957 Encumbrances	8,924.83	
		<hr/>
		\$422,634.38

EXPENDITURES

Payrolls	286,933.47	
Bills	128,878.17	
1958 Encumbrance Account	4,474.50	420,286.14
		<hr/>
Unexpended balance, reverting to City Funds		2,348.24

SECOND, Based on receipts and expenditures as previously

RECEIPTS

RATES

Town of Acushnet, Special Rate	5,824.66
Town of Dartmouth, Special Rate	27,111.87
Under 10,000 cu. ft. per quarter	275,639.49
Over 10,000 cu. ft. and less than 100,000 cu. ft. per quarter	54,621.55

WATER REPORT

Over 100,000 cu. ft. and less than 1,000,000 cu. ft. per quarter	86,159.46
Over 1,000,000 cu. ft. and less than 2,000,000 cu. ft. per quarter	23,899.95
Over 2,000,000 cu. ft. per quarter	142,931.32
Estimated and building purposes	139.50
Total receipts for water	616,327.80
Meter rentals	69,318.56
Demands and charges	1,721.45
Total receipts for water, meter rentals, demands and charges	687,367.81
Miscellaneous receipts (for details see credits under expenses)	32,663.38
	720,031.19
Receipts from 1955 Bond Issue	1,166,812.81
Receipts from 1956 Bond Issue #1	10,109.45
Receipts from 1956 Bond Issue #2	57,141.47
Total receipts from Bond Issues	1,234,063.73
Total Receipts from all sources	1,954,094.92

EXPENDITURES

Bills from Appropriation	\$ 128,878.17	
Bills from Bond Issue	1,234,063.73	
Payrolls from Appropriation	286,933.47	
Interest	79,411.67

REPORT OF THE SUPERINTENDENT

June 5, 1959

To the New Bedford Water Board.

Gentlemen:

The annual report of the superintendent on operations of the department for the year 1958 and on the general condition of the works is respectfully submitted.

The financial report of the water registrar, rainfall records, and the usual tables showing in detail the work of the department, are included.

RAINFALL

Total rainfall for the calendar year 1958 was measured at the Quittacas Pumping Station as 61.97 inches, 35 percent higher than the average for the past sixty-four years.

POND ELEVATIONS

The water level of Great Quittacas reached its highest elevation at 52.33 on April 16, 1958. Its lowest level was 47.18 on January 2, 1958, and the average for the year was 46.22.

The water level in Little Quittacas, which is controlled by means of a sluice gate at the narrows between Great and Little Quittacas Ponds, varied between elevation 46.90 in January and 48.30 in March, with an average for the year of 47.75.

REPAIR SHOP

For many years, the roofs and buildings at the repair shop at 213 No. Water Street have needed

maintenance attention and have continued to deteriorate annually due to the lack of maintenance. At this time, the roofs leak so badly that floors are buckling. Roof boarding and planking are rotten in some places. Window sashes are so fragile that it is nearly impossible to change a pane of glass; even careful washing may dislodge the window glass from its frame.

Decision as to necessity of removal of this shop because the land on which it stands may be required as a part of the 95E Road Improvement Program could not be made at the end of the year because of uncertainty as to the final location of the spur connection from 95E to the western end of the Fairhaven Bridge. It seems folly to expend money in any substantial amount on a plant which might shortly have to be abandoned. However conditions have reached an unbearable stage in the present buildings. The heating equipment is outmoded and in extremely poor condition.

It is estimated that the restoration of the buildings and heating plant and other necessary maintenance and improvement work at this shop might be accomplished for \$100,000.

ELEVATED STORAGE TANK

The situation with reference to this tank on Hathaway Road is somewhat the same as in the case of the shop. It is not known at this time whether its removal will be required as a part of the construction of the new Highway 95E.

The tank is badly in need of internal and external painting. It has long since passed the point of presentable appearance and reached a point where corro-

sion of the unprotected metal is occurring. In the event it is decided this tank may remain where it is, it should receive a thorough cleaning inside and outside and a good two coat paint job.

CHLORINATOR BUILDING, HIGH HILL

This installation was completed and has been in regular operation since the acceptance of the 42 inch transmission line. It provides automatic regulation of the dosage of chlorine to water leaving High Hill Reservoir. Chlorination of this outflow from the reservoir into the City has resulted in satisfactory and much improved sanitary quality of the water, as evidenced by regular bacteriological analyses made by the New Bedford Board of Health Laboratory and by the State Department of Public Health at the Lawrence Experimental Station.

INDUSTRIAL PARK

As a part of the development of the Industrial Park, a 16 inch cast iron water main was extended from Braley Road across Phillips Road and installed throughout the length of the Industrial Park with regularly spaced hydrants at the banks of the paving.

This cost was charged to the Water Department and through the end of the year had reached a total payment of \$47,626.50 to the contractor.

DISTRIBUTION SYSTEM

Thirty-seven hydrants have been damaged as a result of traffic accidents. The total cost of repairs was \$2,734.00 of which \$2,179.73 has been collected.

LEAKS

There have been twenty-eight leaks on main pipe during the year, as herewith shown.

Date	Size	Location	Cause	Cost
Jan. 2	4"	Metropolitan Ave., 29.0' E. x W. line Commonwealth Ave.	Main leak	\$ 94.43*

*No actual payment made for cost of street repairs.

15,838 feet of distribution main, in sizes from 4 inch to 12 inch, were added to the system during the year, and 2,023 feet were removed.

No distribution pipe less than 4 inch has been laid and 110 feet removed. The total length now in use is 11,024 feet.

Fifty-eight stop gates have been set and fourteen of those previously set have been removed. The total number now in use is 3,429.

The total number of small size gates now in use is 93.

The total number of waste gates now in use is 210.

The total number of air taps now in use is 216.

Nineteen private gates have been set and four of those previously set have been removed. The total number now in use is 1,021.

Eighteen new hydrants have been set and five of those previously set have been removed. The total number now in use is 2,076.

The total number of water cart hydrants now in use is 23.

The total number of sprinkler cart hydrants now in use is 8.

One hundred sixty service pipes have been laid and twenty-seven of those previously laid have been removed. The total number now in place is 22,693. Of this number, three hundred thirty-four are unmetered fire services, nineteen thousand six hundred sixteen are metered, and the balance, two thousand seven hundred forty-three are not in use.

Four hundred twenty-eight taps have been cleaned as follows:

Rust 403; trouble inside 25.

Two thousand two hundred eighty-four meters have been removed for repairs, and two thousand two hundred ninety-five have been reset. Also two hundred sixteen new meters have been set for the year, making the total number now in use 19,616.

CONSUMPTION OF WATER

The consumption of water for the year has been as follows:

Month 1958	Monthly Consumption				Daily Average Consumption
	New Bedford	Dartmouth	Acushnet	Total	
	Gallons	Gallons	Gallons	Gallons	Gallons
January	534475200	22304800	5890500	562670500	18150661
February	493404000	18522550	5247750	517174300	18470511

November	526356200	18643100	4008000	549007300	18281677
December	557184050	17394500	3887250	578465800	18660187
Totals	6,668,007,450	264,767,050	57,178,500	6,989,953,000	
Averages	18,268,514	725,389	156,653		19,150,556

Maximum daily consumption—(24 hrs.) Aug. 6.....27,680,000
 Minimum daily consumption—(24 hrs.) Apr. 6.....10,341,100
 Average daily consumption—6 a.m. to 6 p.m.....10,602,599
 Average night consumption—6 p.m. to 6 a.m..... 8,547,956

Amount of water consumed shown on above table includes the supplying of about 111.3 miles of distribution pipes located in the adjoining towns of Dartmouth and Acushnet. Dartmouth supplies 11160 consumers, of which 2070 are summer residents, through 3881 taps. Acushnet supplies 4422 consumers through 1134 taps.

COMPARISON OF THE CONSUMPTION OF THE YEAR 1958 WITH THE
RECORD OF THE 77 PREVIOUS YEARS

Year	Estimated Population	Estimated number of consumers	Number of taps	Total number of Gallons consumed	Average daily consumption	Gallons per day to each inhabitant	Gallons per day to each consumer	Gallons per day to each tap	No. of meters

*Includes population supplied in towns of Dartmouth and Acushnet 5015 taps, 15582 consumers.

‡This consumption is for eleven months.

†This consumption is for thirteen months.

CONSUMPTION

The average daily consumption, 19,150,556 gallons, shows a decrease of 5.7% under 1957.

The excellent quality of our water for chemical processes and the extremely low average rate for takers using in excess of five million gallons per month have been important factors in the decision of several large industries to develop plants in our city.

The following table shows the number of accounts, registration, and income in the several steps of the sliding scale of rates.

DATA ON METERED CONSUMPTION AND REVENUE

July 1, 1957 through June 30, 1958

	No. of Accounts	Number of gallons		Receipts for metered water		
		Total Gallons	Per Account	Total Receipts	Per Account	Per M Gallons
*Using less than minimum rate viz: 30,000 gallons per year Using over minimum rate but less than 75,000 gallons per quarter Using between 75,000 and 750,000 gallons per quarter Using between 750,000 and 7,500,000 gallons per quarter Using between 7,500,000 and 15,000,000 gallons per quarter Using over 15,000,000 gallons per quarter	3,682	64,792,500	17,597	\$ 28,655.07	7.78	.442

*Includes special assessment accounts

**Not charged to City of N. B. Depts.

The superintendent wishes to express to the Mayor, the Water Board, and the members of the City Government, appreciation of their assistance during the year; and to repeat his gratitude to the employees of the water department for their co-operation in serving the public.

Respectfully submitted,

H. C. MANDELL,

Superintendent

SUMMARY OF STATISTICS
FOR THE YEAR ENDING DECEMBER 31, 1958
IN FORM RECOMMENDED BY THE NEW ENGLAND
WATER WORKS ASSOCIATION

NEW BEDFORD WATER WORKS
NEW BEDFORD
BRISTOL COUNTY, MASS.

GENERAL STATISTICS

Population by census of 1958 — 102,764.

Date of construction, 1866 to 1869, inclusive. Further supply, 1895 to 1899, inclusive.

By whom owned, City of New Bedford.

Source of supply.—Water was first introduced on Nov. 26, 1869.

From that date until July 10, 1899, the supply was taken from a storing reservoir artificially formed by constructing a dam across the valley of the Acushnet River, seven miles north of the centre of the City. This supply was augmented by a connection made in 1886 with Little Quittacas Pond.

Since July 10, 1899, the whole supply has been taken from Great and Little Quittacas Ponds, eleven miles north of the centre of the city.

In 1926, under Legislative Authority to take 11½ million gallons of water per day from Long, Assawompsett and Pocksha Ponds, a connection was made to bring water from Pocksha into Great Quittacas Pond, when needed.

Mode of supply.—Previous to July 10, 1899, the water flowed by gravity from the Acushnet Storing Reservoir (grade 40' + high water New Bedford Harbor) through a brick conduit 3 feet wide, 4 feet high, 5 6/10 miles long to a receiving reservoir (capacity 3 million gallons; grade 30') located opposite the Purchase Street Pumping Station. Thence it was pumped into the Mt. Pleasant Distributing Reservoir (capacity 15 million gallons; grade 154') located 1,879 feet distance, from whence it flowed by gravity into the city's distributing system.

Since July 10, 1899, the entire supply has been pumped from Little Quittacas Pond (grade 52'). It is pumped through two 48 inch force mains 8¼ miles long to a distributing reservoir (capacity 67 million gallons; grade 216') located upon High Hill, in the town of Dartmouth. From this reservoir it flows into the city's distributing system by gravitation through two 36-inch cast iron pipes averaging 4 1/17 miles in length.

It is also possible to pump directly to the city through a 48" and 36" main using the reservoir as a balance. This latter connection was completed in 1922.

The first named system is not now in use.

PUMPING STATISTICS

LITTLE QUITTACAS STATION

1. Builders of Pumping Machinery.

Electric Units

- No. 1 10 million gallons per day centrifugal pump manufactured by DeLaval Steam Turbine Company, driven electrically by 400 H. P., 3 phase, 4160 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.
- No. 2 Duplicate of No. 1.
- No. 3 15 million gallons per day centrifugal pump manufactured by DeLaval Steam Turbine Company, electrically driven by 600 H. P., 3 phase, 4160 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.

The three foregoing pumps are controlled by switches and automatic starting equipment in a switchboard manufactured by the Electric Machinery Company.

- No. 4 30 million gallons per day centrifugal pump manufactured by DeLaval Steam Turbine Company, directly driven by 1000 H.P. Baldwin locomotive type 6 cylinder supercharged Diesel engine, 600 R.P.M., manufactured by the Baldwin Locomotive Company.

Electric current purchased of New Bedford Gas and Edison Light Company.

Total installed capacity, 65 million gallons per day.

LITTLE QUITTACAS STATION — Pump 4 "Diesel"

2. Description of fuel used.
- a. No. 2 Diesel oil.
 - b. Brand of oil — various.
 - c. Price of oil per gallon — delivered to Little Quittacas Station 12.04 cents.
3. Oil consumed for the year — 20,430 gals.
4. Total pumpage for the year — 413,270,000 gallons by Venturi meter.
5. Average static head against which pumps work — 168.5.
6. Average dynamic head against which pumps work — 193.
7. Number of gallons pumped per gallon of fuel oil — 20,229 gals.
8. Number of gallons raised 100 feet per gallon of fuel oil — 39,042 gals.
- 9a. Cost per million gallons raised into High Hill Reservoir — \$12.32.
- 9b. Cost per million gallons raised into High Hill Reservoir — diesel fuel only — \$5.95.

LITTLE QUITTACAS STATION — Pumps 1, 2, 3

10. Total pumping time for the year 14,371 hrs.
11. Total current used for the year 4,684,570 K. W. H.
12. Total pumpage for the year 6,578,523,088 gallons.
13. Number of gallons pumped per K. W. H. 1,404.
14. Number of K. W. H. required to raise one million gallons into High Hill Reservoir 712.
Cost per K. W. H. varies in accordance with amount consumed.
15. Average cost per K. W. H. \$.0121.
- 16a. Cost per million gallons raised into High Hill Reservoir, (Pumps 1, 2, 3) \$17.81.
b. Per power only \$8.64.
Total cost of pumping, figured on pumping station expenses, viz: \$122,814.68.
17. Per million gallons pumped \$17.57.
18. Per million gallons raised one foot (dynamic) — .09 cents.
Cost of pumping figured on total maintenance and interest on bonds, (see financial CC + DD) less credits, viz: \$481,216.10.
19. Per million gallons pumped \$68.83.
20. Per million gallons raised one foot (dynamic) — 37 cents.
Cost of pumping figured on total maintenance, interest on bonds and bond payments (see financial CC + DD + EE) less credits, viz: \$634,216.10.
21. Per million gallons pumped \$90.71.
22. Per million gallons raised one foot (dynamic) — 49 cents.

Establishing a Committee on City Property

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Fifty-Eight

AN ORDINANCE

ESTABLISHING A COMMITTEE ON CITY PROPERTY

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Chapter 3, Section 13 of the Code of the City of New Bedford is hereby amended by adding the following words "city property" so that as amended it will read:

Sec. 13. Enumeration.

The following standing committees are hereby established: audit, city property, finance, ordinances, shellfish, sidewalk betterments, streets, and street lights.

SECTION 2. Chapter 3 of the Code of the City of New Bedford is hereby amended by adding a new section, viz:

Sec. 20. Duties of committee on city property.

The committee on city property shall have the care, custody, control and management of all public buildings and of all real estate acquired by the city through tax title proceedings or otherwise, and of the erection, alteration and repairs thereof, except as is otherwise provided by law or ordinance. They shall recommend to the city council, whenever they deem it expedient, the disposal of city owned property which is not needed for municipal purposes.

SECTION 3. This ordinance shall take effect in accordance with the provisions of General Laws (Ter. Ed.) Chapter 43.

CITY ORDINANCE

Perpetual Care Funds

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Fifty-Nine

AN ORDINANCE

**RELATIVE TO THE DISPOSITION OF FUNDS DEPOSITED
FOR PERPETUAL CARE.**

Be it ordained by the City Council of the City of New Bedford
as follows:

SECTION 1. The Code of the City of New Bedford is hereby
amended by striking out Section 9 of Chapter 8 and substituting
the following in place thereof:

Section 9. Disposition of Funds.

All sums now held by the city, and all sums received by the
city treasurer under provisions of section eight may be deposited
in some savings bank in this commonwealth or may be invested
in securities which are legal for the investment of funds of
savings banks under the laws of the commonwealth. The city
treasurer shall keep books in which he shall enter full details
of such investments. He shall collect the income of said invest-
ments and properly credit the same on his books. It shall be the
duty of said board to apply the income of said investments for
the preservation and care of the lots for which said deposits
have been made, and also all sums held by the city and otherwise
applicable to the care of particular lots in both public and pri-
vate cemeteries.

SECTION 2. This ordinance shall take effect in accordance with
the provisions of Chapter 43 of the General Laws (Ter. Ed.)
